

Proposed Agenda:

**PROPOSED ABERDEEN 200MW WIND FARM IN THE EASTERN CAPE
PROVINCE**

**SCOPING PHASE: PUBLIC MEETING
19 JANUARY 2012
ABERDEEN LIBRARY HALL, MAIN ROAD, ABERDEEN
17:00 - 18:30**

1. Welcome, introduction & apologies
2. Purpose of the meeting
3. Background & introduction by Eskom
4. Overview of the proposed project and potential environmental impacts
5. Discussion
6. Closure & way forward

**SUSTAINABLE
FUTURES ZA**

PROPOSED ESKOM ABERDEEN WIND ENERGY FACILITY ENVIRONMENTAL IMPACT ASSESSMENT

FOCUS GROUP MEETING

NOTES OF CAMDEBOO MUNICIPALITY FOCUS GROUP MEETING

Held on
Thursday, 19 January 2012,

Graaff Reinet

Savannah Environmental (Pty) Ltd

Address: PO Box 148
Sunninghill, 2157
Tel: 011 234 6621
Fax: 086 684 0547
E-mail: alicia@savannahsa.com

Sustainable Futures ZA

Address: PO Box 749
Rondebosch,
Cape Town, 7701
Tel: 083 325 9965
Fax: 086 510 2537
E-mail: swjohnston@mweb.co.za

Please address any comments to Shawn Johnston at the above address.

ENVIRONMENTAL IMPACT ASSESSMENT PROCESS: PROPOSED ESKOM ABERDEEN WIND ENERGY FACILITY

Venue: Camdeboo Town Hall Graaff Reinet
Date: Thursday, 19 January 2012
Time: 14h00 – 15h00

WELCOME AND INTRODUCTION

Shawn Johnston, the process facilitator welcomed all the stakeholders present for the opportunity to meet and clarify the proposed Eskom Aberdeen Wind Energy Facility project. He introduced the Eskom and Savannah Environmental team members. Leonie Fouche then requested the Camdeboo Municipal Team introduce themselves.

MEETING ATTENDEES

Name	Organisation & Position
Shawn Johnston	Sustainable Futures ZA- Public Participation Specialist
Alicia Govender	Savannah Environmental
Jo-Anne Thomas	Savannah Environmental
Tobile Bokwe	Eskom
Reggie Chippe	Eskom
Belinda Roos	Eskom
Izak Rumboll	C.K. Rumboll and Partners
Ivor Berrington	Camdeboo Municipality
Leonie Fouche	Camdeboo Municipality
Brian April	Camdeboo Municipality
Vuyelwa Mpekula	Camdeboo Municipality

APOLOGIES

No apologies were received.

BACKGROUND & TECHNICAL ASPECTS REGARDING THE PROPOSED PROJECT

Alicia Govender presented the findings of the draft scoping report for the proposed Eskom Aberdeen Wind Energy Facility (Presentation attached).

DISCUSSION SESSION

Question / Comment	Response
Leonie Fouche: Would you be able to provide us with detailed maps of the proposed Aberdeen wind energy facility?	Alicia Govender: Yes we can do so via email.
Leonie Fouche: Is the land private land?	Reggie Chippe: The farms were bought by Eskom and consolidated for the proposed Aberdeen wind energy facility.
Ivor Barrington: How did the land transfer subdivision occur without the input from the Camdeboo Municipality. We never saw this application and request. Please clarify the process.	Izak Rumboll: It was done through the Camdeboo Municipality. We can provide you with details.
Ivor Barrington: Why was this area selected for a wind energy facility?	Reggie Chippe: This area was identified through the NASA wind data process, which showed the site as being favourable for a wind energy facility.
Leonie Fouche: I just want to note, that all applications and requests to the Camdeboo Municipality must go through the office of the Municipal Manager.	Alicia Govender: Noted, a copy of the draft report is to be submitted to the Camdeboo Municipality will be addressed to the Municipal Manager.
Leonie Fouche: Have avifauna studies been undertaken as part of this EIA process?	Alicia Govender: Yes, an avifauna study has been undertaken as part of the environmental impact assessment process. The avifauna specialist scoping report will be appended to the draft scoping report that will be out for public review shortly.
Leonie Fouche: What will the extent of the employment opportunities be for the community? And What will the duration of employment be and at what skills levels will staff be employed?	<p>Alicia Govender: The social impact assessment at the Impact Assessment phase will deal with these key questions, as this information is not available at this stage.</p> <p>Reggie Chippe: Eskom is looking at various options and is compelled by Government to have a large local employment component. This will be clarified as the project develops.</p>

Question / Comment	Response
Leonie Fouche: I'm glad local labour will be used in the construction and operational phases of the project.	Reggie Chippe: Yes local labour will be used. It is a requirement of Government.
Ivor Barrington: Will Eskom use the extended public work programme for job creation?	Reggie Chippe: Eskom will have its own internal process.
Vuyelwa Mpekula: Was the Spatial Development Framework considered in the planning of this project?	Reggie Chippe: Yes Eskom has taken this document into consideration. Alicia Govender: The social specialist also used this as a guideline document to undertake the social impact assessment that will form part of the draft scoping report that will be out for public review shortly.
Ivor Barrington: Where are you sourcing water from for the construction and operational phases of the project?	Reggie Chippe: Eskom are currently investigating all options for sourcing of water. Jo-Anne Thomas: All water requirements will be considered in the environmental impact assessment.
Ivor Barrington: The water use needs to be discussed with the Department of Water Affairs and the Camdeboo Municipality.	Reggie Chippe: Eskom notes this point.
Ivor Barrington: Do you have good wind data?	Reggie Chippe: Eskom are in the process of erecting a wind mast to verify that the wind data at the proposed site is good. Site specific wind data is necessary for a bankable project.
Ivor Barrington: How long will it take before you start construction on a project of this nature?	Reggie Chippe: It can take up to three years for the construction phase to commence.
Vuyelwa Mpekula: Can you provide us with a detailed design of the footprint and infrastructure of the proposed wind energy facility?	Reggie Chippe: This information will be available in the environmental impact assessment phase.
Vuyelwa Mpekula: Can you clarify how you will be accessing the site?	Reggie Chippe: The site could be accessed from the R61, but Eskom needs to get clarification about where they will be allowed to access the site from. This has not yet been defined.
Vuyelwa Mpekula: Why are you building a new 400KV transmission line to Droe Rivier Substation? Why not tie	Reggie Chippe: The power line alternatives will be clarified and all options will be investigated. This will be done in the EIA phase.

Question / Comment	Response
into proposed Gramma-Grasridge line?	

WAY FORWARD AND CLOSURE

A copy of the presentation was given to Leonie Fouche from the Camdeboo Municipality as per request at the meeting. Shawn Johnston thanked all for the opportunity to clarify the proposed project and encourage all to review the draft scoping report and provide the team with their inputs and comments.

The meeting ended at 15h00.

APOLOGIES

No apologies were received.

BACKGROUND & TECHNICAL ASPECTS REGARDING THE PROPOSED PROJECT

Ivan Radebe presented the Eskom Aberdeen project to interested and affected parties present. Alicia Govender presented the findings of the scoping phase for the proposed Eskom Aberdeen Wind Energy Facility.

DISCUSSION SESSION

Question / Comment	Response
Marlon F. De Jager: We thank you for the opportunity to come and clarify the proposed Eskom Aberdeen Wind Energy project.	Shawn Johnston: Comment noted.
Marlon F. De Jager: As small scale emerging farmers we would like to know what benefits the project would provide to us as emerging farmers?	Ivan Radebe: This would become clear as the project develops. The Eskom Foundation and the stakeholder management team would be developing a stakeholder engagement strategy as the project approaches the construction phase.
Marlon F. De Jager: How many jobs will the project generate?	Ivan Radebe: At this point we do not have the exact number for job creation. This will be confirmed in the impact assessment phase.
Marlon F. De Jager: Will the Aberdeen town benefit from the proposed project?	Ivan Radebe: The town will benefit by direct and indirect investment, jobs and services for a project of this nature. All the benefits will be identified and listed in the draft scoping report.
Marlon F. De Jager: What type of skills will be required on this project?	Ivan Radebe: A range of skills from basic to specialist will be required for this kind of project.

Question / Comment	Response
	This will be broadly covered in the social impact assessment process in the impact assessment phase.
Marlon F. De Jager: Where will the construction team live? Will construction workers be housed on site or in town of Aberdeen?	Ivan Radebe: The construction teams will not live on site. Eskom will be looking at the nearest towns to house the specialist and construction teams.
Nicholas Vaster: We appreciate the information, however we do not want to be used and when the project is developed we are not advised and receive nothing from the developer.	Ivan Radebe: Comment noted. Eskom will investigate means of community benefits.
Nicholas Vaster: Where will your water come from for construction and operations? Will you use groundwater? Our area is a water stressed area with limited resources.	Reggie Chippe: Eskom are looking at all water options, which will further be investigated in the impact assessment phase.
Klasie Afrika: What happens with the farm land once the wind energy facility is built? Can you graze sheep there? Would the Aberdeen Small Farmers be able to lease the land and graze sheep amongst the wind turbines?	Reggie Chippe: Currently the land is leased to the farmers that Eskom bought the farms from. Ivan Radebe: We are not sure what the future agreements would be. A project of this nature is regarded as a national key point and it would be rated as a power station and would require a high level of safety and security. We need to clarify if leasing and grazing would be allowed to any farmers. Let's flag this point for investigation.
Klasie Afrika: What happens to the property if Eskom is not successful in developing this project? Klasie Afrika; This is unfair. The biggest problems in this area are: <ol style="list-style-type: none"> 1. Unemployment; 2. Poverty; and, 3. Access to land for emerging black farmers. 	Reggie Chippie: Eskom currently have a clause in their deeds of sale that the land can be purchased back by the original owners at market related prices. Comment has been noted by the public participation practitioner.
Klasie Afrika: I would like to urge the Eskom team present not to provide lip	Ivan Radebe: Comment noted. Eskom will investigate means of community benefits.

Question / Comment	Response
service to the community of Aberdeen. We require Eskom’s commitment to the broader community. All of the issues raised by the emerging farmers are quite sensitive and are burning issues.	
Marlon F. De Jager: I would like to suggest that we keep the lines of communications open with Eskom and that the Eskom team note the issues raised by the Aberdeen Small Farmers.	Shawn Johnston: Comment noted. All issues will be captured and added to the comments and response report with adequate responses to each comment. This comments and response report will form part of the draft scoping report.
Marlon F. De Jager: We need a follow-up meeting to discuss all of the issues raised in this focus group meeting.	Shawn Johnston: Follow-up meetings will be held with the Aberdeen Small Farmers, Ward Councilors, Camdeboo Municipality and the Aberdeen Commercial Farmers in the impact assessment phase of the EIA process.

WAY FORWARD AND CLOSURE

Shawn Johnston thanked all of the Aberdeen Small Farmers for their inputs and the opportunity to clarify any issues or concerns related to the proposed project. He encouraged all stakeholders to review the draft scoping report once it is out for review, and to provide the team with their inputs and comments.

The meeting ended at 18h00.

APOLOGIES

No apologies were received.

BACKGROUND & TECHNICAL ASPECTS REGARDING THE PROPOSED PROJECT

Ivan Radebe presented the Eskom Aberdeen project to the interested and affected parties present at the meeting. Alicia Govender thereafter presented the findings of the draft scoping phase for the proposed Eskom Aberdeen Wind Energy Facility.

DISCUSSION SESSION

Question / Comment	Response
S.A. Marx: Will the site be fenced with security?	Reggie Chippe: Yes it will be.
S.A. Marx: Will the construction workers live on the site or in a compound.	Reggie Chippe: No one will live on the proposed development site. This component is not included in the environmental impact assessment. Eskom will investigate accommodation options in the surrounding towns.
S.A. Marx: Were will you obtain the large volumes of water you require for the construction and operational phase? The area is quite a water	Ivan Radebe: Eskom is looking at all sources of water for uses on the project. This will be clarified within the environmental impact assessment process, and further investigated in

Question / Comment	Response
stressed area and we have existing problems with our boreholes.	the impact assessment phase.
C. Gouws: How many jobs will be created on this project?	Ivan Radebe: Eskom is in the development phase and is currently calculating the employment opportunities for the short-term and long-term sustainability.
A.P. Els: Why must a new transmission line be built to the Droe Rivier Substation? Why not just build a new substation on site and link into the Gamma-Grasridge transmission line?	Ivan Radebe: Eskom is investigating all options. These were the suggestions provided by the Eskom grid designers and Eskom Transmission.
A.J. Beyers: What will happen to the current farmers leasing the farm portions once the project is built?	Ivan Radebe: This has not yet been clarified. Eskom currently has lease agreements with farmers Eskom bought land from.
A.J. Beyers: Are you planning to change the lease agreements to accommodate the Aberdeen Small Farmers?	Reggie Chippe: The land use after the project is built needs to be clarified due to the nature of the facility. The facility would be regarded as a national key point.
A.P. Els: What is the timeframe before construction commences?	Ivan Radebe: Eskom anticipate about three years before any construction can commence?
Samantha Jankovich: I think this is a very exciting project that could unite the people of the District and the town of Aberdeen.	Shawn Johnston: Comment noted.
Samantha Jankovich: We need to know how Eskom will interact with the Camdeboo Municipality, ward councillors and the communities around Aberdeen.	Shawn Johnston: This will be clarified as the project develops. The Camdeboo Municipality and ward councilors have been informed about the project. All interested and affected parties need to register to comment and clarify any issues relating to the project. Follow-up meetings will be held with key stakeholders during the environmental impact assessment phase and as part of the social impact assessment.
Samantha Jankovich: We need clarity on the amount of jobs, accommodation facilities for the construction teams and what types of services can be provided by the community in Aberdeen.	Shawn Johnston: Comment noted. Details will be included in the impact assessment phase.
Izak van der Merwe: We would be concerned about safety and security and stock theft with large numbers of people moving into the area.	Ivan Radebe: Eskom will focus on safety and security in and around the proposed site.

Question / Comment	Response
<p>Desmond Coetzee: We are very excited about this project, we want to make sure the entire community are informed. We can assist in mobilising the boarder community for the environmental impact assessment phase.</p>	<p>Shawn Johnston: Thank you for the assistance.</p>
<p>Desmond Coetzee: Have you informed the entire Camdeboo Municipality?</p>	<p>Shawn Johnston: Yes we have informed the Camdeboo Municipality through the office of the Municipal Manager Mr. Langbooi and the Integrated Development Plan, Mrs Leonie Fouche.</p>
<p>Desmond Coetzee: How was the general public informed about the project?</p>	<p>Shawn Johnston: We used the local newspaper, posters, bulk mailing at the Aberdeen post office, the Aberdeen Small Farmers and Aberdeen Commercial Farmers Association via the distribution of the background information document in English and Afrikaans.</p>
<p>Desmond Coetzee: For the follow-up meetings, I would like to suggest you use the ward councillors to mobilise the broader community. We can assist with spreading the word about meetings, making posters and using the loudhailers to announce the meetings in the township areas.</p>	<p>Shawn Johnston: Thank you for the assistance and advice.</p>

WAY FORWARD AND CLOSURE

Shawn Johnston thanked all for their inputs and insights. He reminded all of the comment period and recommended that interested and affected parties read and review the draft scoping report once it is available and advised all that they should submit their comments to the project team.

The meeting ended at 19h00.

This assessment is being conducted on behalf of Eskom Holdings Limited (Sien keersy vir Afrikaans)

**SUSTAINABLE
FUTURES ZA**

05 January 2012

Dear Stakeholder

**PROPOSED ABERDEEN 200MW WIND FARM,
EASTERN CAPE PROVINCE
(DEA Ref No. 12/12/20/2211)**

**NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT PROCESS AND
INVITATION TO PARTICIPATE IN THE PROCESS**

Eskom Holdings SOC Limited is proposing the establishment of a wind farm and associated infrastructure on an identified site which is located approximately 24 km west of the town of Aberdeen in the Eastern Cape Province, within the Camdeboo Local Municipality. This proposed project will be referred to as the Aberdeen 200 MW Wind Farm and will be constructed over an area of approximately 8 198 ha in extent. The proposed facility will have a **generating capacity of up to 200 MW** and will comprise a cluster of up to 150 wind turbines (typically described as a wind energy facility or a wind farm). Each turbine will have a generating capacity of between 1.5 MW and 3 MW. Each turbine will have a **steel tower** (of up to 140m in height), a **nacelle** (gear box) and three **rotor blades** with a rotor diameter of up to 140 m (i.e. each blade up to 65 m in length).

Other infrastructure associated with the wind energy facility is proposed to include:

- » **Concrete foundations** to support the turbine towers
- » **Cabling** between the turbines to be lain underground
- » An on-site **substation** to facilitate the connection between the facility and the electricity grid
- » An **overhead power line** (400kV) feeding into Eskom's electricity grid at the Droërvier Substation, approximately 140 km from the site
- » Internal **access roads** between wind turbines
- » **Borrow pits** within the site for the construction of access roads
- » **Office/Workshop** area for operations, maintenance and storage
- » **Information centre**

PUBLIC FEEDBACK MEETING

All interested and affected parties are cordially invited to attend a public feedback meeting to discuss the proposed project as well as the key findings of the studies completed to date. The meeting is scheduled to take place as follows:

DATE: Thursday, 19 January 2012
TIME: 17:00 -18:30
VENUE: Aberdeen Library Hall, Main Road, Aberdeen

This is an open meeting and anyone is welcome to attend. Although you are not required to pre-register for the meeting, it would be appreciated if you could confirm your attendance with the undersigned on or before Wednesday, **18 January 2012.**

Should you have any comments, please submit them to:

Shawn Johnston of Sustainable Futures ZA

P.O. Box 749, Rondebosch,

Cape Town, 7701

Tel: 083 325 9965

Fax: 086 510 2537

Email: swjohnston@mweb.co.za

All comments received will be included in the Final Scoping Report, which will be submitted to the National Department of Environmental Affairs (DEA) for review and comment.

Yours sincerely,

Shawn Johnston
Process Facilitator
