Dear all,

Thank you for attending the public meeting on the 25th October 2016.

We would like to draw your attention that these minutes were drawn from notes taken from the Public Meeting; please provide corrections / additions if applicable.

We would like to advise that while utmost care was taken to record your comments accurately and faithfully, there may be some discrepancies between what has been written in the minutes that follow and what was actually said. We apologise for this and request that you correct the minutes and e-mail back to us for final amendments.

Many thanks for your participation at the meeting, as well as for your understanding regarding the minutes.

Regards

Judith Fasheun

Proposed "Aggeneis-Paulputs" 400kV Transmission Powerline & Substations Upgrade, Northern Cape Province

Meeting with I&APs held at 10h00 on 25th October 2016 at Aggeneys Rec Club

Attendees:

Judith	Fasheun	JF	Mokgope Consulting
Victoria	Somo	VS	Mokgope Consulting
Mpilo	Masondo	MM	Eskom
Jamila	Kombe	JK	Eskom
Stephen	Quincy	SQ	Pofadder Councillor Ward 4
Arno	Engelbrecht	AE	Black Mountain Mine
Anne-Marie	Cloete	AC	Black Mountain Mine
Pieter	Ventes	PV	Black Mountain Mine

Item No	Item Description	Response / Comment
1.	JF: Welcome and Introduction	
2.	JK: Presentation 1	
3.	JF: Presentation 2	
4.	DISCUSSION	
	AE: In one of your slides you mentioned that the line will strengthen the Pofadder community supply. We just need to be very careful with that statement because the Pofadder community power supply comes from a different source.	meeting we will amend the slides that need to
	The second question I have is just the line route through the Biotherm area. But as you have mentioned, there might be changes on line 1 and 2 due to the Biotherm solar facilities.	

Item No	Item Description	Response / Comment
	Just on JF's presentation, the strengthening of the grid will comply only to Onseepkans loads and not to Pofadder. Just verify that because Pofadder gets supply from a different line.	
	On one line you said that the line is needed to strengthen the demand but also you need to mention that it needs to strengthen the solar supply. So it is not only to cater for the people but also for the solar energy coming in. So I think that was missing in one of the bullet points.	
	Just to go back to my comment, the line is crossing Pofadder but it does not supply Pofadder. In your presentation you mentioned that the line will strengthen the electricity supply for the Pofadder community and technically that is not correct. You can rather say it will strengthen the grid for the people of Onseepkans. You can say Onseepkans area because Paulputs supplies Onseepkans. So you are not supplying Pofadder with this power so no need to mention it.	JK: You are correct. It's just that we say Pofadder area because at Paulputs there isn't actually a town because that is the station where it is sitting. Yes you are correct and we will make changes in our statements. The reason why we named the towns is because it makes it easier for somebody to have an idea what is where. We are lucky that Aggeneis substation is close to Aggeneys town, hence that helps somebody to picture where that substation is. So your comment is correct so maybe let's not use the word Pofadder area and rather use Onseepkans.
	PV: In terms of your Route 3: where it goes through our property in the dunes that is definitely a red flag breeding ground and also be aware of all the three lines. They go through the quartz patches and your sensitive plants / succulents. Therefore on our properties, no construction should take place on the calcretes patches and quartz patches.	JF: Thank you for bringing those features to our attention. We will also verify with the vegetation specialist to guide us where exactly we should avoid the sensitive plants and to also apply the mitigations during construction phase. During the scoping period we will request that you highlight the boundary of your property where you mentioned construction should not take place.
		MM: We will take your comments on sand dunes into consideration. Thank you.
5.	Meeting was declared closed.
