

Brits Municipality Meeting: Notes

Held on 7 May 2007 at Madibeng Municipality

Attended by: Jonel Boonzaaier (Margen Industrial Services) JB
Jacques Boonzaaier (PBA International SA) JMB

JB gave short introduction on the project and where the process is at. JMB then gave a short summary. The project started in 2006 with advertisements and public meetings and open days held in Brits in August 2006. The Scoping Report was completed and submitted to DEAT in November 2006. This report was approved by DEAT in April 2007. We are currently in the Environmental Phase with detail studies to be done in the corridors to determine where the lines should run.

Documents are also available and the information is also available on Eskom's website.

Questions from Councillors:

Can we see the maps?

A set of maps was left at the council.
