ENVIRONMENTAL IMPACT ASSESSMENT (EIA) PROCESS

OMEGA SUBSTATION: (REF: 12/12/20/636)

Notice is hereby given in terms of Regulation 4 (6) of the regulations published in Government Notice number R. 1183 under Section 26 of the Environment Conservation Act (Act number 73 of 1989) of intent to carry out the following activity:

The construction of the Omega 765kV substation on the farm "Groot Oliphantskop 081". The farm is situated approximately 5km East South East of Koeberg. The proposed substation is part of the Cape Strengthening programme to supply the anticipated increase in demand for electricity to serve the load centre of Cape Town. The Omega substation will serve as the termination point for the planned Gamma-Omega 765kV power line. The substation will also act as a switching station for the four existing 400kV transmission lines, traversing the farm which will be connected, to the Omega substation.

150Ha will be required to construct the substation with structures approximately 45m high.

or visit www.eskom.co.za/eia to register, view information and / or submit comment.

Deadline for public comment: 17 September 2004

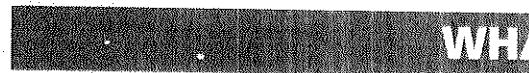

dam waste water treatment Works - R28-million.

"The R71-million represents only 4.6% of the money allocated across the city. This is simply not enough to spend on an area that represents the growth corridor of the City of Cape Town that is desperately in need of roads and other infrastructure that will keep the economy of the city turning over," said Mr Neilson.

"There is no provision at all on this budget for roads other than

OMGEWINGSIMPAKSTUDIE (OIS) PROSES

OMEGA SUBSTASIE: (VERW: 12/12/20/636)

Kennis word hiermee gegee in terme van Regulasie 4 (6) van die regulasies gepubliseer in die Regeringskennisgewing Nr. 1183 onder Artikel 26 van die Wet op Omgewingsbewaring (Wet Nr. 73 van 1989), met betrekking tot die voorneme om die volgende aktiviteit uit te voer. Die konstruksie van die Omega 765KV substasie op die plaas "Groot Olifantskop 081". Die plaas is ongeveer 5km Oos-Suid-Oos van Koeberg geleë. Die voorgestelde substasie is deel van die Kaap Versterkingsprogram om te voorsien aan die verwagte toename in vraag na elektrisiteit om die lassentrum van Kaapstad te bedien. Die Omega substasie sal as afhegtingspunt dien vir die beplande Gamma-Omega 765kv kraglyn. Die substasie sal ook as skakelstasie dien vir die vier bestaande 400KV transmissielynne wat die plaas deursny en wat met die Omega substasie gekonnekteer sal word.

150Ha word benodig om die substasie op te rig met strukture van ongeveer 4m hoog.
