

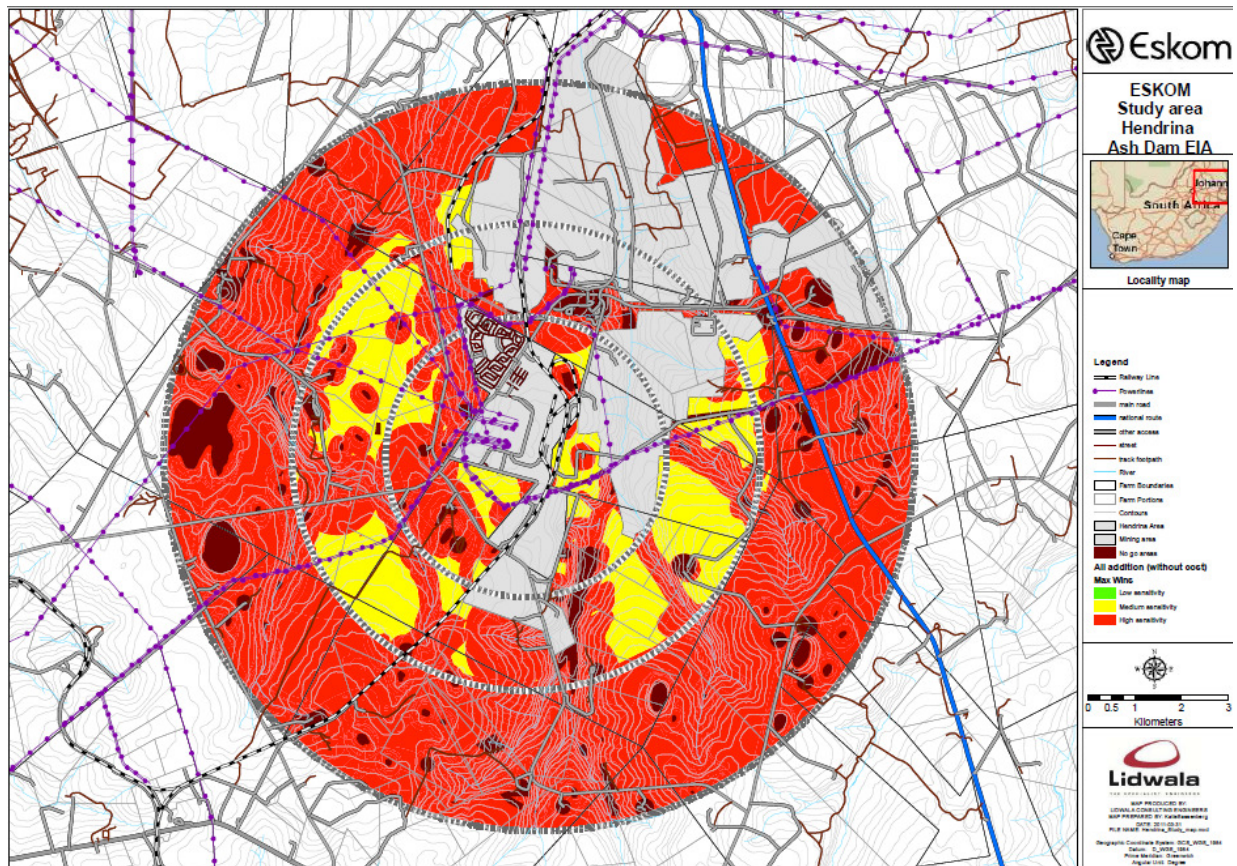

Figure 4.19: Combined Social Sensitivity (no factor)

## 5 CONCLUSIONS

**Figure 5.1 to 5.6** are the results of overlaying the social, biophysical and technical input maps together, thereby illustrating the overall environmental sensitivity of the area. These maps have been done both with and without the influence of the technical / cost layer in order to ensure that this aspect did not overshadow / influence the outcome of the mapping process.

**Figure 5.1:** Overall Environmental Sensitivity (Max Wins – without technical / cost)
