Subject: RE: TTLIP - Reply to Power lines over farm Platberg North 431

Dear Pam

My apologies, I was under the impression that I did respond but going through my *sent items* I cannot trace such an e-mail which confirms that I had not yet responded.

- Is the entire shaded area proposed for expropriation?

No, the shaded area on the snap shot provided below indicates the corridor as per the Application submitted to the Department of Environmental Affairs (DEA). As per previous correspondence, through the consultation process it was requested that the EIA team provides an *indication* as to where the lines could go – especially for landowners to enable them to provide written comments.

Should an Environmental Authorisation be granted, then Eskom will negotiate a route and a registered servitude with each registered landowner. Expropriation might only be entered into should an agreement between the two parties not be reached and all avenues have been exhausted through Eskom's negotiation process. You will notice that I've CC Eskom in this e-mail to confirm / correct this fact as it falls outside SiVEST Scope of Work.

- On the previous maps it does not show a centre pivot of ours on portion 9 of 430-76. The proposed line appears to go through the middle of it.

The 1:50 000 maps used are the latest versions as per the Surveyor General's Office and it seems that the centre pivots on the said property also does not show on Google Earth. However, Eskom prefers to avoid centre pivots as far as possible.

We've received the co-ordinates of the centre pivot this afternoon from Ross and it has been forwarded to our GIS Specialist as well as Eskom.

- Is this map now the final proposals.

As you are aware, the Revised DEIR is out for public review and depending on the written comments received there could be a change or two, it is all dependent on the comments received on the Revised DEIR. Should this be the case, all registered I&APs will be alluded to the change in the notification letter of the Final EIR. The point raised regarding the centre pivot on the said property has now been recorded and the EIA team and Eskom has been made aware of this fact.

Please do not hesitate to forward us any further questions for clarification that you may have.

Kind regards

Subject: FW: TTLIP - Reply to Power lines over farm Platberg North 431

Dear Nicolene,

There were a few questions that I asked in my last email to you that I have not got clarity on yet. Would you mind replying to them as we need to make decisions.

Thank you,
Pam Kietzmann

Good Day Nicolene,

Just a few questions that are not clear in our minds

- Is the entire shaded area proposed for expropriation?
- On the previous maps it does not show a centre pivot of ours on portion 9 of 430-76. The proposed line appears to go through the middle of it.
- Is this map now the final proposals.

Eagerly awaiting your reply,

Thank you
Pam Kietzmann

Subject: EIA: TTLIP - Reply to Power lines over farm Platberg North 431

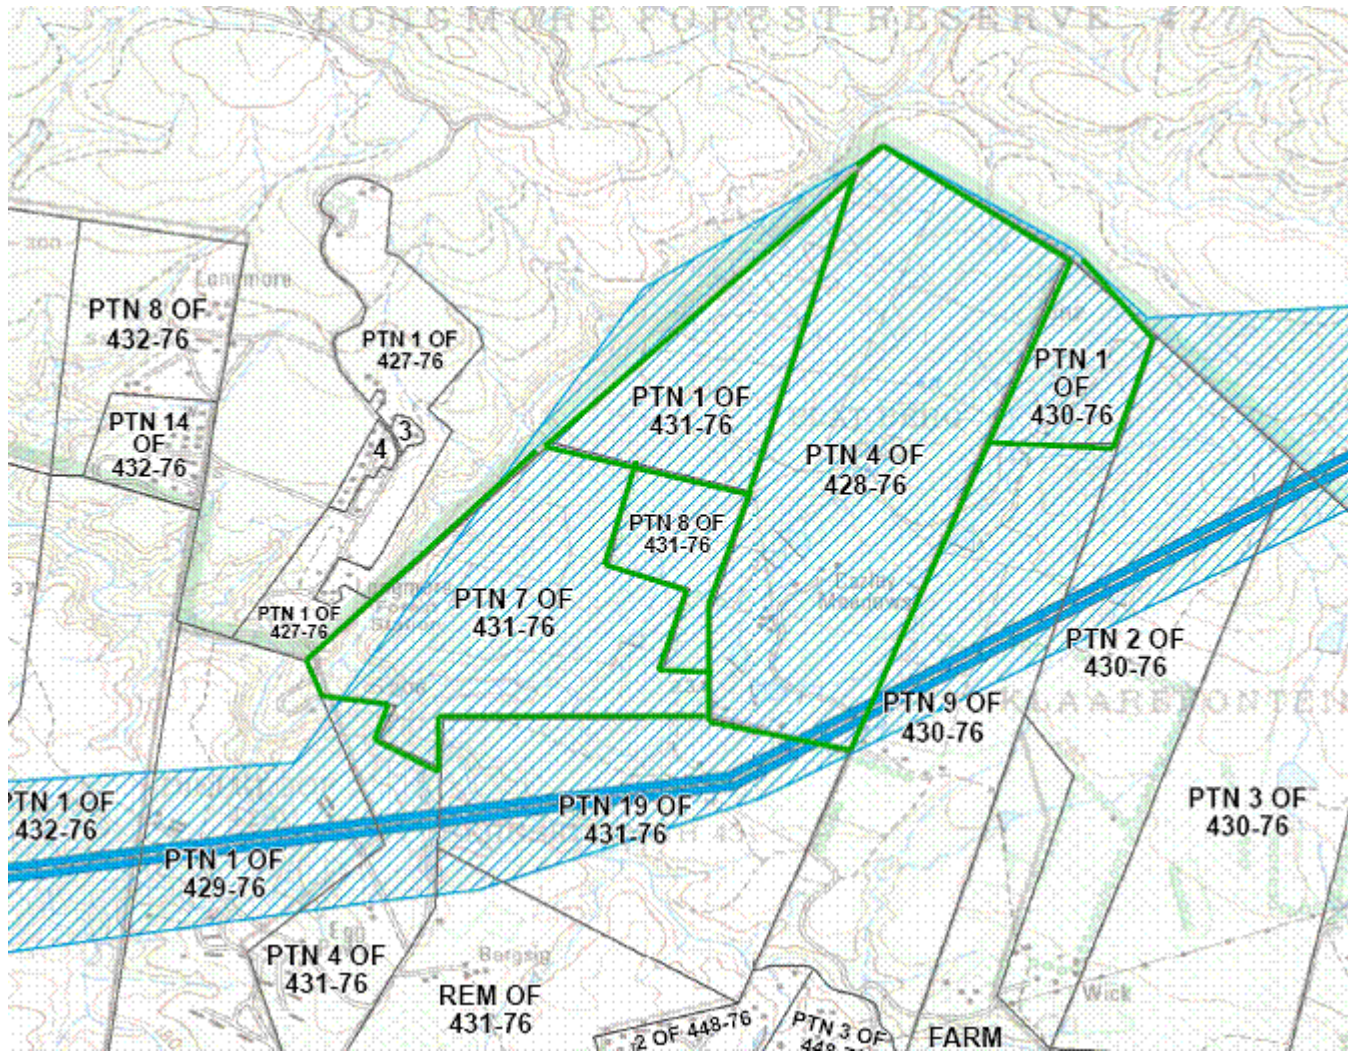

Dear Pam

The cadastral maps have been updated and is now also available on SiVEST's website

<http://www.sivest.co.za/Download.aspx> then scroll down to **9520 Eskom Thyspunt EIA**. I will forward you the *folder name* shortly. For the interim, below is a snap shot of your properties that falls within the proposed Southern Corridor – the two solid blue lines are the EIA Team-Preferred routing that was undertaken as requested by stakeholders and possibly affected landowners.

We would just like to remind you that the Application to the Department of Environmental Affairs is for a corridor and not a route.

Your written comments on the contents of the Revised DEIR and specifically the corridor in your area of interest would be appreciated.

Kind regards

Subject: RE: Power lines over farm Platberg North 431

Yes sure,
Portion 1 of the farm Bersig North no 431

Portion 4 [Platberg] of the farm diepe Kloof no 428

Portion 7 of Bersig North 431

Portion 8 of farm Bersig North no 431

Klaarefontein Kloof no 430 portion 1

The farm is now known as Clifton Meadows and it was Cazley Meadows just North of Thornhill bordering on the Longmore forest station.

Thanks for your help.

Pam

Dear Pam

Would you please be so kind as to forward me the Portion no as well. We are in the process of uploading the cadastral maps on the SiVEST website, but I will gladly assist you with your query.

Kind regards

Subject: Power lines over farm Platberg North 431

Dear Sir / Madam

I have studied your maps left at the Thornhill hotel and would like some clarity from you as to how your proposed power lines are going to affect the farm Cazley Meadows / Clifton Meadows also known as Platberg North 431.

This farm is North of Thornhill and we are a dairy farm with centre pivot irrigation. Please could you email a clear, detailed map of the proposed northern line and the southern line.

Thanking you,
Pam Kietzmann
