Dear Mike,

In response to your queries below, I can provide the following:

Power lines are proposed in both the northern and southern corridor. There will be 3 power lines in the northern corridor and 2 power lines in the southern corridor. 5 power lines in total for the whole project.
Approval is being sought for both corridors.

The corridors in question are approximately 2km wide (slight variations along the corridor).
For the northern corridor, the power lines will require a servitude of approximately 165m.
For the southern corridor, the power lines will require a servitude of approximately 110m.
Approval is being sought for the full 2km corridors, specifically so that there is reasonable space / room for flexibility when negotiating and pegging final power line alignment.

I trust this answers your questions accordingly.
Please feel free to contact myself or Nicolene Venter for any further queries you may have.

Kind Regards

REBECCA THOMAS *B.Sc Env. Sc.; PDM Business Management*

Hi Rebecca

Is Eskom looking to build both the north and south line, i.e. will both corridors be approved? How much flexibility is there to position the line/s with the corridor/s?

Thanks
Mike

Importance: High

Dear Mike,

Please find attached the Google .kml files for the latest Thyspunt Corridors and preferred EIA Team alignment.

As far as I have been informed, the discussion between yourselves and Paul da Cruz/Eskom has been taken into consideration and should reflect as such in these files.

Please confirm with us the routing is in line with the developments or inform us of any concerns accordingly.

Just to also clarify that EA for the corridor is being applied for, but where Mainstreams developments are proposed attention should be focused on the alignment, which should have been aligned in accordance with your meetings with SiVEST and Eskom.

Kind Regards

Hi Nicoleen/ Rebecca

When I try to download anything off the website it gives me an error message...

The main thing I'm after is the routing of the preferred and alternative powerline corridors as I want to check if it still clashes with our current and future plans for wind energy development in the area.

Please send through the relevant map/s (including shapefiles if possible) as soon as possible.

Thank you and regards
Mike Mangnall

Dear Stakeholder

We would like to take this opportunity to inform you that the Revised Draft Environmental Impact Assessment Report (DEIR) for the above-mentioned proposed project is available for public comment and review as from FRIDAY 21 SEPTEMBER 2012 to WEDNESDAY 31 OCTOBER 2012 (end of business day). Attached for your perusal, please find attached your notification letter and a Revised DEIR Comment Form.

Hard copies of the Revised DEIR can be reviewed at:

Venue	Address	Contact Person	Contact Details
Oyster Bay Estate	6 Torny Street, Oyster Bay	Ms Elmarie Meyer	082 568 1759
St Francis Library	1 Assisi Drive, St Francis Bay	Mrs K De Groot	042 294 2259
Humansdorp Library	9 Bureu Street, Humansdorp	Mrs M Loggenberg	042 200 8300
