

# TABLE OF CONTENT

## Chapter 1: Introduction

1.	INTRODUCTION	1-1
1.1.	Project background	1-1
1.2.	Assessment of radiological impacts	1-3
1.3.	Summary of the Environmental Authorisation process for the proposed nuclear power station	1-5
1.3.1.	Original application for a nuclear power station	1-6
1.3.2.	Scoping Phase	1-7
1.3.3.	Impact Assessment Phase	1-9
1.3.4.	Review of Revised Draft EIR and Revised Draft EIR Version 2	1-9
1.4.	Scope of the Environmental Impact Report	1-9
1.5.	Assumptions and limitations of the EIA	1-11
1.5.1.	Assumptions	1-11
1.5.2.	Limitations	1-12
1.6.	Way forward	1-13

## Chapter 2: Applicant Details

2.	DETAILS OF THE APPLICANT, THE ENVIRONMENTAL ASSESSMENT PRACTITIONER AND THE DECISION-MAKING AUTHORITY	2-1
2.1.	Introduction	2-1
2.2.	Details of the Applicant	2-1
2.3.	Details of the Environmental Assessment Practitioner	2-1
2.4.	Details of Competent / Relevant Authority	2-2

## Chapter 3: Project Description

3.	3 PROJECT DESCRIPTION	3-5
3.1.	Introduction	3-5
3.2.	Other projects related to Nuclear-1	3-6
3.3.	Principles of producing nuclear heat for electricity generation	3-7
3.4.	History of Nuclear Power Plants	3-8
3.5.	Nuclear technology for Nuclear-1	3-9
3.6.	Operation of a typical nuclear power station	3-10
3.6.1.	Cooling circuits	3-10
3.6.2.	Reactor pressure vessel	3-11
3.6.3.	Reactor core and fuel	3-12
3.6.4.	Pressuriser	3-14
3.6.5.	Steam generator	3-14
3.6.6.	Turbine	3-14
3.6.7.	Condensers	3-14
3.6.8.	Electricity generation	3-14
3.7.	Timeframes for construction and power station life cycle	3-15
3.8.	Major associated infrastructure and other activities required during construction	3-15
3.8.1.	Access roads	3-15
3.8.2.	Security fencing around the property	3-16
3.8.3.	Delineation of the Owner Controlled Boundary	3-16

3.8.4. Power supply to the site	3-18
3.8.5. Water supply to the site	3-19
3.8.6. Site offices	3-19
3.8.7. Groundwater monitoring	3-20
3.8.8. Development of construction and operational accommodation	3-20
3.9. Construction of the terrace and power station	3-22
3.9.1. Site layout and position of plant	3-22
3.9.2. Excavation and disposal of spoil	3-22
3.9.3. Dewatering	3-22
3.9.4. Buildings	3-23
3.9.5. Permanent terrace road and lay down storage area	3-23
3.9.6. Installation of plant/equipment	3-23
3.10. Additional associated infrastructure	3-23
3.10.1. Helipad	3-25
3.10.2. Meteorological station	3-25
3.10.3. Backup power supply	3-26
3.10.4. Visitors' centre	3-26
3.10.5. Water requirements	3-26
3.10.6. Sewage treatment plant	3-27
3.10.7. Desalination plant	3-27
3.10.8. Chlorination Plant	3-28
3.11. Marine works	3-29
3.11.1. Intake tunnels	3-29
3.11.2. Outfall tunnels/channels	3-29
3.12. High voltage yard	3-30
3.13. Materials required for construction	3-30
3.14. Roads	3-31
3.14.1. Duynfontein	3-31
3.14.2. Bantamsklip	3-31
3.14.3. Thyspunt	3-32
3.15. Operational inputs and outputs	3-33
3.16. Construction waste	3-35
3.16.1. General construction waste	3-35
3.16.2. Non-radioactive hazardous construction waste	3-36
3.17. Operational waste	3-36
3.17.1. General operational waste	3-36
3.17.2. Non-radioactive, hazardous operational waste	3-36
3.17.3. Radioactive, hazardous operational waste	3-36
a) Low Level Radioactive Waste (LLW)	3-37
b) Intermediate Level Radioactive Waste	3-37
c) Vaalputs radioactive waste disposal site	3-39
d) High Level Radioactive Waste	3-40
3.18. Transportation of solid radioactive waste	3-42
3.19. Transportation of nuclear fuel	3-43
3.20. Gaseous emissions	3-44
3.21. Liquid effluent	3-44
3.21.1. Non-radioactive effluent	3-44
3.21.2. Radioactive effluent	3-45
3.22. Safety	3-46
3.22.1. General safety considerations	3-47

3.22.2. Nuclear emergency planning zones	3-47
3.22.3. Security zones	3-49
3.22.4. Occupational exposure to radio nuclides	3-50
3.22.5. Public exposure to radio nuclides	3-50
3.23. Human resources	3-50
3.23.1. Construction personnel	3-51
3.23.2. Operational personnel	3-51
3.23.3. Transport and traffic	3-51
3.24. Environmental aspects related to the nuclear power station	3-52
3.25. Decommissioning of the proposed nuclear power station	3-53
3.26. Decommissioning strategies	3-54
3.26.1. Factors influencing the choice of decommissioning strategy	3-54
3.26.2. Preparation of a decommissioning plan for Nuclear-1	3-56

#### Chapter 4: Need and Desirability

4. NEED FOR AND DESIRABILITY OF THE PROJECT	4-1
4.1. Past electricity demand and predicted future trends	4-1
4.2. Peak demand vs. installed and nominal capacity	4-2
4.3. Reserve margin	4-3
4.4. Impacts of the economic slowdown on electricity demand	4-4
4.5. Balancing electricity supply and demand	4-4
4.5.1. Impact of demand side management on electricity demand	4-4
4.5.2. Current initiatives to increase electricity generation capacity	4-5
4.5.3. Choice of generation mix for future supply	4-7
4.5.4. Climate change considerations	4-7
4.6. Summary of the need for Nuclear-1	4-9
4.7. Eskom motivation for using Pressurised Water Reactor Technology for	
4.8. Nuclear-1	4-10
4.9. Need and desirability guidelines	4-10
4.10. Conclusion	4-19

#### Chapter 5: Alternatives

5. PROJECT ALTERNATIVES CONSIDERED	5-1
5.1. Introduction	5-1
5.2. Site Alternatives	5-2
5.2.1. Background on the site identification and outcome of the Scoping Phase	5-2
5.2.2. The outcome of the Scoping Phase of the EIA process	5-2
5.2.3. DEA's response to the proposed exclusion of Brazil and Schulpfontein	5-3
5.2.4. Coega as an alternative site	5-3
5.2.5. Description of the identified site alternatives	5-4
5.3. Activity Alternatives: power generation technologies	5-11
5.3.1. Activity Alternative 1: Nuclear generation	5-11
5.3.2. Activity Alternative 2: Wind generation	5-12
5.3.3. Comparative costs of power generation alternatives	5-13
5.4. Nuclear Technology alternatives: nuclear plant types	5-19
5.5. Layout alternatives on each of the sites	5-25
5.5.1. Duynefontein	5-26
5.6. Construction and Operational alternatives	5-26

5.6.1. Source of water supply	5-26
5.6.2. Management of brine	5-27
5.6.3. Outlet of water and chemical effluent	5-28
5.6.4. Management of spoil material	5-28
5.7. Off-site access routes to the Thyspunt site	5-30
5.8. On-site access routes at the Thyspunt Site	5-30
5.9. No-Go (No development) alternative	5-39

## Chapter 6: Planning and Legislative Context

6. PLANNING AND LEGISLATIVE CONTEXT	6-1
6.1. Introduction	6-1
6.2. The constitutional law dimension and supporting framework legislation regulating just administrative action and access to information	6-2
6.2.1. The Constitution (1996)	6-2
6.2.2. Promotion of Access to Information Act, 2000 (Act No. 2 of 2000)	6-8
6.3. Policy and planning context	6-9
6.3.1. The Nuclear Non-Proliferation Treaty and domestic implementation arrangements	6-9
6.3.2. United Nations Declaration on the Rights of Indigenous People, 2008	6-10
6.3.3. Nuclear Energy Policy for the Republic of South Africa	6-11
6.3.4. White Paper on the Energy Policy of the Republic of South Africa	6-13
6.3.5. Radioactive Waste Management Policy and Strategy	6-13
6.3.6. Nuclear Governance	6-14
6.3.7. Integrated Energy Plan	6-16
6.3.8. National Integrated Resource Plan	6-17
6.3.9. Energy Efficiency Strategy of the Republic of South Africa	6-18
6.3.10. Energy Security Master Plan – Electricity (2007-2025)	6-19
6.3.11. National Response to South Africa’s Electricity Shortage	6-20
6.3.12. National Nuclear Disaster Management Plan	6-21
6.3.13. National Spatial Biodiversity Assessment (NSBA)	6-25
6.3.14. National Biodiversity Strategy Action Plan (NBSAP)	6-26
6.3.15. Draft National Strategy for Sustainable Development	6-26
6.3.16. Integrated Development Plans (IDP) relevant to the proposed alternative sites for Nuclear-1	6-26
6.4. Legislative Context: National Legislation	6-28
6.4.1. The National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA)	6-28
6.4.2. The National Environmental Management: Air Quality Act, 2004 (Act No. 39 of 2004)	6-40
6.4.3. National Water Act, 1998 (Act No. 36 of 1998)	6-41
6.4.4. The Water Services Act, 1997 (Act No. 108 of 1997)	6-41
6.4.5. The National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004)	6-42
6.4.6. National Environmental Management: Protected Areas Act, 2003 (Act No. 57 of 2003) (NEM:PAA)	6-43
6.4.7. Sea-Shore Act, 1935 (Act No. 21 of 1935)	6-43
6.4.8. The Maritime Zones Act, 1994 (Act No. 15 of 1994)	6-43
6.4.9. National Environmental Management: Integrated Coastal Management Act, 2008 (Act No. 24 of 2008)	6-44
6.4.10. Marine Living Resources Act, 1998 (Act No. 18 of 1998)	6-46

6.4.11. National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) (NEM: Waste Act)	6-46
6.4.12. National Radioactive Waste Disposal Institute Act (Act 53 of 2008)	6-47
6.4.13. Conservation of Agricultural Resources Act, 1983 (Act No. 43 of 1983)	6-48
6.4.14. National Heritage Resources Act, 1999 (Act No. 25 of 1999)	6-48
6.4.15. Hazardous Substances Act, 1973 (Act No. 15 of 1973)	6-49
6.4.16. Transportation of Dangerous Goods and Substances	6-49
6.4.17. Non-Proliferation of Weapons of Mass Destruction Act, 1993 (Act No. 87 of 1993)	6-49
6.4.19. National Key Points Act, 1980 (Act No. 102 of 1980)	6-50
6.4.20. National Energy Act, 2008 (Act No. 34 of 2008)	6-50
6.4.21. National Energy Regulator Act, 2004 (Act 40 of 2004)	6-51
6.4.22. Nuclear Energy Act, 1999 (Act No. 46 of 1999)	6-52
6.4.23. National Nuclear Regulator Act, 1999 (Act No. 47 of 1999)	6-53
6.4.24. Regulations on the development surrounding any nuclear installation to 6.4.25. ensure the effective implementation of any Nuclear Emergency Plan	6-57
6.4.26. Electricity Act, 1987 (Act No. 41 of 1987)	6-58
6.4.27. Electricity Regulation Act, 2006 (Act No. 4 of 2006)	6-58
6.4.28. The Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002)	6-59
6.4.29. The Civil Aviation Act, 2009 (Act No. 13 of 2009)	6-61
6.4.30. Municipal Systems Act, 2000 (Act No. 32 of 2000)	6-61
6.4.31. Municipal Finance Management Act, 2003 (Act No. 56 of 2003)	6-61
6.4.32. Occupational Health and Safety Act (Act 85 of 1993)	6-62
6.5. Legislative Context: Provincial Legislation	6-63
6.5.1. The Land Use Planning Ordinance, 1985 (Ordinance No. 15 of 1985)	6-63
6.5.2. Western Cape Provincial Spatial Development Framework	6-64
6.5.3. Provincial Parks Board Act (Eastern Cape) (Act 12 of 2003)	6-65
6.5.4. Nature and Environmental Conservation Ordinance (Eastern Cape), 6.5.5. 19 of 1974	6-65
6.5.6. Eastern Cape Land Development Objectives Regulations	6-66
6.6. Consistency with National Environmental Management Act (NEMA)	
6.7. Principles	6-67
6.8. Conclusions	6-74

## Chapter 7: Public Participation

7. PUBLIC PARTICIPATION	7-1
7.1. Public Participation Process	7-1
7.2. Objectives of public participation in an EIA	7-3
7.3. Public participation during the Scoping Phase	7-4
7.3.1. Identification of Interested and Affected Parties	7-4
7.3.2. Registration of I&APs	7-5
7.3.3. Announcement of opportunity to become involved	7-5
7.3.4. Obtaining comment – Scoping Phase	7-13
7.3.5. Issues and Response Report	7-13
7.3.6. Draft Scoping Report availability and Public Review	7-14
7.3.7. Distribution of the Draft Scoping Report to State Departments	7-20
7.4. Public Participation for the Draft EIR	7-20
7.4.1. Public review of the Draft EIR and EMP	7-20

7.4.2.	Announcing opportunity to comment on the findings of the Draft EIR	7-20
7.4.3.	Distribution of the Draft EIR for public comment	7-21
7.4.4.	Review period of the Draft EIA Report	7-22
7.4.5.	Opportunities provided to comment on the findings of the Draft EIR	7-22
7.4.6.	Meetings held to review Draft EIR	7-22
7.4.7.	Consultation with Authorities	7-24
7.5.	Public Participation for the Revised Draft EIR	7-25
7.5.1.	Public review of the Revised Draft EIR and EMP	7-25
7.5.2.	Distribution of the Revised Draft EIR and EMP to the public	7-25
7.5.3.	Announcing opportunity to comment on the Revised Draft EIR	7-26
7.5.4.	Opportunity provided to comment on the findings of the Revised Draft EIR	7-27
7.5.5.	Meetings held to facilitate review the Revised Draft EIR	7-27
7.5.6.	Consultation with authorities for the Revised Draft EIR	7-28
7.6.	Summary of issues raised	7-28
7.6.1.	Selected thematic issues and responses	7-28
7.6.2.	Individual Issues and Response Reports	7-74
7.7.	Revised Draft EIR Version 2	7-74
7.7.1.	Announcing opportunity to comment on the findings of the EIA	7-74
7.7.2.	Public open days / meetings	7-74
7.7.3.	Distribution of reports for public comment	7-74
7.8.	Final EIR and EMP	7-75
7.8.1.	Authority review	7-76
7.8.2.	Notification of authority decision	7-76

Chapter 8:

8.	Specialist Assessments.	8-1
8.1.	Description of the affected environment .	8-3
8.2.	Legislation, policies and guidelines .....	8-3
8.3.	Assessment of alternatives .....	8-3
8.4.	Impact identification and assessment.....	8-4
8.5.	Mitigation measures .....	8-4
8.6.	Specialist Peer Reviews.....	8-5
8.7.	Key Conclusion of Specialist Peer Review Reports.....	8-6

Chapter 9:

9.	DESCRIPTION OF THE EXISTING ENVIRONMENT	9-5
9.1.	Physical environment: Duynefontein	9-5
9.1.1.	Geology	9-5
9.1.2.	Seismological risk	9-5
9.1.3.	Geotechnical suitability	9-6
9.1.4.	Dune geomorphology	9-6
9.1.5.	Hydrology	9-7
9.1.6.	Geohydrology	9-7
9.1.7.	Freshwater supply	9-8
9.1.8.	Oceanography	9-8
9.1.9.	Background Radiation	9-9
9.2.	Physical environment figures: Duynefontein	9-11
9.3.	Physical environment: Thyspunt	9-17

9.3.1. Geology	9-17
9.3.2. Seismological risk	9-17
9.3.3. Geotechnical suitability	9-17
9.3.4. Dune geomorphology	9-18
9.3.5. Hydrology	9-20
9.3.6. Geohydrology	9-20
9.3.7. Freshwater supply	9-21
9.3.8. Oceanography	9-21
9.3.9. Background Radiation	9-21
9.4. Physical environment figures: Thyspunt	9-23
9.5. Biophysical environment: Duynefontein	9-28
9.5.1. Air quality and climate	9-28
9.5.2. Flora	9-30
9.5.3. Wetlands	9-31
9.5.4. Vertebrate fauna	9-31
9.5.5. Invertebrate fauna	9-33
9.5.6. Marine biology	9-34
9.6. Biophysical environment figures: Duynefontein	9-36
9.7. Biophysical environment: Thyspunt	9-48
9.7.1. Air quality and climate	9-48
9.7.2. Flora	9-50
9.7.3. Wetlands	9-50
9.7.4. Vertebrate fauna	9-51
9.7.5. Invertebrate fauna	9-54
9.7.6. Marine biology	9-55
9.8. Biophysical environment figures: Thyspunt	9-57
9.9. Socio-economic environment - Duynefontein	9-64
9.9.1. Economic environment	9-64
9.9.2. Demographic statistics	9-67
9.9.3. Visual character	9-68
9.9.4. Heritage resources and archaeology	9-69
9.9.5. Agricultural practices	9-72
9.9.6. Tourism industry	9-74
9.9.7. Noise	9-75
9.9.8. Control Zones	9-75
9.9.9. Transportation	9-75
9.9.10. Urban Land-use	9-76
9.10. Socio-economic environment figures - Duynefontein	9-77
9.11. Socio-economic environment - Thyspunt	9-86
9.11.1. Economic environment	9-86
9.11.2. Demographic statistics	9-89
9.11.3. Visual character	9-90
9.11.4. Heritage resources and archaeology	9-91
9.11.5. Agricultural practices	9-96
9.11.6. Tourism industry	9-97
9.11.7. Noise	9-99
9.11.8. Transport	9-99
9.11.9. Urban Land-use	9-100
9.12. Socio-economic environment figures – Thyspunt	9-101
9.13. Sensitivity mapping of the alternative sites	9-112

9.13.1. Duynefontein sensitivity maps	9-112
9.13.2. Conclusion on Duynefontein environmental sensitivity	9-120
9.13.3. Thyspunt sensitivity maps	9-121
9.13.4. Conclusion on Thyspunt environmental sensitivity	9-128
9.14. Systems Depiction of the Receiving Environment	9-129

## Chapter 10: Impact Assessment

10. THE IMPACT ASSESSMENT	10-7
10.1. Introduction	10-7
10.2. Environmental Costs versus Benefits	10-7
10.3. Defining the Implications of the Impacts for Decision-Making	10-8
10.4. Potential Environmental Costs	10-20
10.5. Potential Environmental Benefits	10-21
10.6. Ascribing Significance for Decision-Making	10-21
10.6.1. Consequence	10-21
10.6.2. Likelihood	10-22
10.6.3. Residual risk	10-22
10.7. Public Health and Safety Risk	10-24
10.7.1. Acute radioactive exposure	10-24
10.7.2. Loss of control of fission	10-24
10.7.3. Failure in the Structural Integrity of the Buildings	10-29
10.8. Non-radiological Risks of Death or Serious Injury	10-31
10.8.1. Vehicle Accidents	10-31
10.8.2. Incidents Related to Criminal Activities	10-31
10.9. Public Health Risks Related to the Nuclear Power Station	10-32
10.9.1. Airborne Dust	10-32
10.9.2. Radioactive emissions during operations	10-32
10.9.3. HIV / AIDS / STD's	10-34
10.9.4. The benefit of infrastructure upgrades	10-34
10.10. Compromise in Quality of Fresh Water Resources	10-35
10.10.1. Radioactive Contamination	10-35
10.10.2. Hydrocarbon and hazardous chemical contamination	10-35
10.11. Compromise in Quality of Groundwater Resources	10-37
10.11.1. Saline Water / Seawater Intrusion	10-37
10.11.2. Radioactive Contamination of Groundwater Systems	10-37
10.11.3. Hydrocarbon and hazardous chemical contamination of groundwater	10-38
10.12. Availability of Groundwater Resources to Other Users	10-39
10.12.1. Abstraction of Groundwater	10-39
10.12.2. Cut-off or Disruption of Groundwater due to Structures	10-39
10.13. Loss of Wetlands and Wetland Function	10-41
10.13.1. Duynefontein Wetlands	10-41
10.13.2. Thyspunt Wetlands	10-41
10.13.3. Physical destruction of wetlands	10-41
10.13.4. Reduced Water Supply	10-42
10.13.5. Inflow of Poor Quality Water	10-42
10.13.6. Placing of Spoil Dumps	10-42
10.14. Reduced Marine Environment Quality	10-43
10.15. Important features of the marine environment	10-43
10.15.1. Duynefontein	10-43

10.15.2. Thyspunt	10-43
10.15.3. Heated Water and Brine Disposal	10-44
10.15.4. Contaminated Run-off	10-44
10.15.5. Spoil Disposal	10-45
10.15.6. Possible impacts on chokka squid	10-45
10.16. Reduced Populations of Threatened Species	10-46
10.17. Threatened species	10-46
10.17.1. Duynfontein	10-46
10.17.2. Thyspunt	10-46
10.17.3. Loss and Fragmentation of Habitat	10-47
10.17.4. Road Mortality	10-47
10.17.5. Mortality Associated with Overhead Transmission Lines/ Substations	10-47
10.17.6. Disturbance of breeding populations	10-48
10.17.7. Transformation of Wetlands	10-48
10.17.8. Cooling water systems and Brine disposal	10-48
10.17.9. The conservation benefit of site enclosure	10-49
10.18. Changes in Livelihoods	10-50
10.18.1. Spoil Disposal at Sea Altering Surf Breaks	10-50
10.18.2. Radiological Contamination of Agricultural Resources	10-50
10.18.3. Change in Sense of Place	10-50
10.18.4. Reducing Chokka Squid Populations	10-51
10.18.5. Increased Agricultural Production	10-52
10.18.6. Increased Business Opportunities	10-52
10.18.7. New Job Opportunities	10-52
10.19. Heritage Resources	10-54
10.19.1. Duynfontein heritage features	10-54
10.19.2. Thyspunt heritage features	10-54
10.19.3. Destruction of Heritage Artefacts	10-54
10.20. Nuisance	10-56
10.20.1. Noise	10-56
10.20.2. Visual impact	10-56
10.20.3. Informal Settlements due to Nuclear-1	10-56
10.20.4. Additional Vehicular Traffic	10-57
10.21. Summary of Residual Risks	10-57
10.22. Comparing the Sites – A Strategic Overview of the Project	10-58
10.23. Evaluation of Other Alternatives	10-62
10.23.1. Forms of power generation	10-62
10.23.2. Freshwater supply	10-62
10.23.3. Utilisation of Abstracted Groundwater	10-64
10.23.4. Disposal of Brine	10-64
10.23.5. Intake of seawater	10-65
10.23.6. Marine outfall	10-65
10.23.7. Management of spoil material	10-65
10.23.8. Nuclear plant types	10-66
10.23.9. Position of the nuclear power station on the sites	10-66
10.23.10. The Potential for Additional Nuclear Power Stations per Site	10-67
10.24. No-go alternative	10-68

## Chapter 11: Conclusions, Recommendations and Way Forward

11.	CONCLUSIONS, RECOMMENDATIONS AND WAY FORWARD	11-2
11.1.	Need for the project	11-2
11.2.	Alternatives	11-2
11.2.1.	Site alternative	11-2
11.2.2.	Generation alternatives	11-3
11.2.3.	Modes of transport during construction	11-3
11.2.4.	Fresh water supply alternative	11-3
11.2.5.	Utilisation of abstracted groundwater	11-3
11.2.6.	Disposal of brine	11-3
11.2.7.	Intake of seawater	11-3
11.2.8.	Release of cooling water and effluent	11-3
11.2.9.	Management of spoil	11-3
11.2.10.	No-go alternative	11-4
11.2.11.	Additional power stations per site	11-4
11.2.12.	Coega as an alternative site	11-4
11.3.	Key mitigation measures and conditions of authorisation	11-4
11.3.1.	All sites	11-5
11.3.2.	Duynefontein	11-6
11.3.3.	Thyspunt	11-6
11.4.	Way forward	11-6

Chapter 12: References
