Response and discussions	Joseph Mokganeedi asked if the proposed line is going to run parallel the existing 32KV power line or somewhere else. He added that they do not have a problem with the proposed project as the community is going to benefit from it by a form of strengthening their electricity supply. SV confirmed that the proposed power line is going to run parallel the existing power line. Mr Mashaba indicated that the community has agreed not to object to any project that passes through their village provided the project will benefit them. He believes that the community can get benefit from the project by a form of job opportunities. The Tribal Council is happy as the proposed project is going to the mines, even if Eskom

Speaker	Notes
Welcome and Introduction	Mr Paul Maroga (Secretary) welcomed everyone to the meeting and he introduced the Traditional Council and asked the consultants and Eskom to introduce themselves.
Project background and purpose	Rejoice Aphane (RA) highlighted the following: <ul style="list-style-type: none"> Proposed project background; Progress to date; and Public Participation process <p>Rofhiwa Magodi (RM) presented a map reflecting the proposed site to the council.</p> <p>RA presented the motivation and highlighted that Sebenzile Vilakazi (SV) will present the technical part of the project.</p>
Response and discussions	Mr Paul Maroga (PM) asked how far the proposed power line is from their village. <p>RM indicated distance between the village and proposed power line to PM on google earth. The council was able to identify the affected villages that falls under the Maroga Tribal Council.</p> <p>PM indicated that the proposed powerline passes through villages that do not have electricity, as such, they will not allow the powerline to pass through their village before the area is electrified. PM emphasised that the village must be electrified first then they will not have a problem with the proposed power line.</p>

	<p>for the actual steel tower and from the 55m they further require 10m.</p> <p>Mr Mamphela indicates that this actually mean that Eskom need 75m in total.</p> <p>The Chief asked if Eskom pay for the 75m.</p> <p>SV indicated that Eskom only pay for 55m and not the required extra 10m from the edge of the servitude. He also indicated that if there is a structure Eskom will pay for it</p> <p>Mr Mamphela said that he has a problem with Eskom not paying for the extra 10m as this is a land that could have been used for development.</p> <p>The Chief said that SV must investigate the matter, as they are not satisfied with the fact that Eskom only pay for the 55m servitude. He also indicated that they do not have the Title deed like the private land owners. Their title deed are with the department of Land Reform on behalf of the community.</p> <p>Mr Galane asked if there will be any job opportunities if the proposed project is authorised.</p> <p>SV said that if the corridor is authorised the following will be undertaken:</p> <ul style="list-style-type: none"> • The contractor will employ locals for unskilled labour. It should be noted that the job opportunities is going to be limited as most of the job within the power line construction is semi-skilled and skilled labours i.e. Engineers. • Eskom also offer training for locals especially those with N3-N7 in Electrical engineer qualifications for instance. • Eskom also form a steering committee before the project commence.
Conclusion and Way forward	<p>PM indicated that they will await our invitation for public meeting and the meeting must be on Sundays only.</p> <p>RA requested to take pictures of people who attended the meeting; however, PM declined, and indicated that the pictures will only be taken during the mass meeting with the community as this was just the briefing to the Tribal council.</p>
Adjournment	<p>PM thanked everyone and the meeting was adjourned.</p>
