They are great minds that first failed but didn't give up. "Every challenge provides an opportunity to become more empowered." This, an opportunity to become more empowered." This, says education expert Tract Salter is what parents should keep in mind when pushing their children to do more, become more.

Too often young children are coerced into performing well at school. Academic achievements are all well and good but the results could be chamaging to their self-esteem. Salter has sage advice for parents who are concerned about their children's academic success and it all comes down to cultivating a "growth mindset".

"Children who think their intelligence and ability is 'fixed'—that they are stuck at a certain level of smarts—tend to do less well than those who think that they can," she said.

"However, learners who understand that their intelligence or skill level can be improved by effort and experimentation seek more challenges, learn from mistakes and don't give up in the face of failure."

failure."

The terms "growth mindset" and "Tixed mindset" were first coined by Stanford University psychologist Caroll Dweck, one of the world's leading minds in the field of motivation. Her research has focused on why people succeed and how to foster success. During a 2012 interview she discussed the difference between the two mindsets, saving fixed mindset students believe their basic abilities, their intelligence, their talents, are fixed traits. For her growth mindset concept she drew on neuroscience to show that a learner's brain can improve with dedicated effort. That means personal qualities and abilities are not fixed but can change by simply adapting your approach.

Salter said the way we praise our children plays an important older that rather than using general praise, for instance saying you can do it because you are so smart, parents and teachers should praise specific efforts that lead to improvements such as focus persistence and work habits.

Dié vlak van 'n indeks wat wys hoe Britse huishoudings oor hul finansies voel, is vandeesmaand die laagste in meer as 'n jaar te midde van onsekerheid oor Brexit.
Volgens IHS Markit, wat die indeks saamstel, het die indeks sedert Augustus verlede jaar elke maand gedaal. Huishoudings is versigit yir groot uitgawes soos motors en vakansies.
"Die skerp daling in huishoudings se aptyt vir groot aankope wys duidelik dat onsekerheid oor Brexit verbruikersbesteding beinvloed," se Tim Moore van IHS.
Volgens Moore word die negatiwieti in 'n mate getemper deur Brittanje se lae werkloosheidskoers van 4%, stygende lone en lae inflasie.

Wat betref die vervaardiging en modernisering van die Rooivalk aanvalsheilkopter, wat deur Denel vir die lugmag gebou is, word in strategiese vennootskap binne die volgende nege tot 12 maande in die voornisig gestel.

**Drie affelings - Land Mooliity Technologies (LMT), Denel Vehicle Systems (DVS) en Denel Land Systems (DLS)-smelt saam. Al drie vervaardig 'n verskiedenheid voertuig komponente. Hehmoed-Römer Heitman, militêre kenner, sê dié plan maak die meeste sin van die ingrypings.

LMT sou die grootste gedeelte van Projek Hoefyster, wat vir die weermag nuwe gevegsvoertule van nagenoeg R10 miljard moet bon, behartig. Die Hoefyster werk is egter aan die Gupta beheerde VR. Laser eerder as LMT gegee. Luidens Denés en uwe besnoeiingsplanne sal die projek, wat reeds jare agter is, wêér uitgestel moet word.

Riaz Saloojee, voormalige uitvoerende hoof van Denel, het die afgelope week voor die Zondo-kommissie oor staatskaping getuig hy is uit sy pos verwyder omdat hy nie die Guptas ter wille wou wees nie. Hy het getuig hy is na Saxomwold ontbied waar hy meegedeel is die Guptas was om geld uit die Wapenbedryf in Asië en die Midde-Ooste te maak.

Denel Dynamics, die maanskappy se winsgewendste afdeling, word behou en gaan voortaan grootliks op uitvoer en vennootskappe konsentreer.

Dié afdeling bou missiele en volgens Heitman is Dynamics een van d'e gehalte kan bou. Saam met 'n kundige vennoot kan dit die kroonjuwel in die wapenbedryf in Asië en die Midde-Ooste te maak.

Qua de de de verder geluig de verderdwyd wat missiele van die gehalte kan bou. Saam met 'n kundige vennoot kan dit die kroonjuwel in die wapenbedryf plaasilk en internasionaal word, se bi.

Qua sê die strategie is "onderhewig aan prosedurele gesprekk met ons aandeelhouer, die departement van openbare ondernemings, sleutel-rolspelers en kliënte".
