

ENVIRONMENTAL IMPACT ASSESSMENT PROCESS

ENVIRONMENTAL IMPACT ASSESSMENT FOR PROPOSED WESKUSFLEUR SUBSTATION, WESTERN CAPE PROVINCE

DEA Reference Number: 14/12/16/3/3/2/508

NEAS Reference: DEA/EIA/0001780/2013

The Environmental Impact Assessment (EIA) process advertised during April 2013 whereby notice was given that Eskom Holdings SOC Limited proposes to develop a new 400/132kV substation (called Weskusfleur) in the vicinity of the existing Koeberg power station in the Western Cape Province is now continuing.

REVIEW OF FINAL ENVIRONMENTAL SCOPING REPORT

Due to restrictions placed on any further development around Koeberg Power Station the EIA process was placed on hold. The Final Scoping Report (FSR) was already out for public comment during late 2013 and submitted but was rejected by the Department due to these development restrictions. Eskom has now successfully complied and the restrictions were lifted. The EIA process can therefore continue. (Still under Government notice, R544, R545 and R546, of 18 June 2010) The same FSR plus proof of compliance by Eskom is now available for public comment. All interested and/or affected parties (I&APs) are hereby notified that the proposed Weskusfleur Substation FSR (Hard copy) will again be available at the venues indicated below (hard copy), or website (<http://www.lidwala.com>) or CD on written request, for review and comment from **Tuesday, 26 May 2015 till Monday, 6 July 2015:**

Met verwysing na die OIE kennisgewing soos geadverteer April 2013, dat Eskom Holdings SOC Beperk die konstruksie van 'n nuwe 400/132kV substasie (Weskusfleur Substasie) voorstel in die omliggende omgewing van die bestaande Koeberg Kragstasie in die Wes-Kaap Provinsie.

OORSIG VAN FINALE OMGEWINGSBESTEKOPNAMEVERSLAG

As gevolg van ontwikkelings beperkinge geplaas op die area rondom Koeberg Kragstasie is die OIE tydelik in 2013 gestaak.
