

Use Less and Save More

Inclining Block Tariff (IBT) for prepaid electricity

From 1 April 2011 Eskom's prepayment metered customers will benefit from Inclining Block Tariffs or the IBT structure.

Do your sums

It's really easy to work out what your prepaid electricity will cost every month. Simply use the example below:

Imagine you purchase **R250,00** a month and want to know the units you will receive.

This is how it will be calculated:

Taking the rate in the first block	50kWh X 65,72c/kWh
Taking the rate in block two	287,91kWh X 75,42c/kWh
Total	Add the two consumption blocks together (50kWh + 287,91kWh) = 337,91kWh

The Inclining Block Tariffs are structured as follows:

Electricity Consumption Blocks	Energy Rate* (cent/kWh)
Block 1 [≤50kWh]	65,72
Block 2 [>50 - ≤350kWh]	75,42
Block 3 [>350 - ≤600kWh]	109,50
Block 4 [> 600kWh]	120,10

*Note: The energy rate includes VAT and the Environmental Levy charge.

Being efficient with your electricity means that you pay less! For more information, Eskom customers can contact **08600 37566** or go to www.Eskom.co.za/tariffs.
