ENKELE OPMERKINGS OOR DIE HUIDIGE
 KEUSE VAN TERREINE

VERWYS SKRYWE 14/7/2006

DIE OPMERKING KAN GEMAAK WORD
 DAT DIT ONWYS IS OM NOG 'N MEGA KRAAGSTASIE
 LANGS DIE BESTAANDE KENDALSTASIE TE PLAAS-
 WEENS RISIKOBEESTUUR, KOOLVOORSIENING
 EN DIE DRUK OP DIE PAAIE INFRASTRUKTUUR
 DIE VERKEER VAN SWAAK KOOVOERTUIE BY
 DIE KENDAL MIELIESILOOS VERBY IS 'N
 PROBLEEM.

DIE VLOEI VAN WERKNEMERS VAN
 PHOLA NA KENDAL IS MINDER VOORDELIG
 AS DIE NA WILGE.

OM 'N DROE STASIE SOOS MATIMBA
 LANGS KENDALSTASIE TE BOU SE
 STRUKTUUR VERSKIL HEELTEMAK VAN DIE
 VAN DIE KENDALSTASIE EN SAL MAAR
 BRA SWAK AFSTEK VAN 'N ESTETIESE
 OOGPUNT.

WAT VAN DIE OMGEWINGSVERANDERING
 AGV. DIE VERHITTING VAN DIE ATMOSFEER
 MET TWEE MEGASTASIES LANGS MEKAAR
 - DIE KWESSIE VAN DIE WARM-LUG-BORREL.

SO VER MY KENNIS STREK IS
 DIE OORSPRONKLIKE PLAAS ROODEPOORTJE
 SONDER STEENKOOLO AGV WATER UIT-
 WASSING - DUISENDE GELEDE

01366926921

WAAR DIE WATER VAN DAAN GEKOMEN
GEGAAN HET IS VIR MY N RAAISEL.
DIE FEIT IS DAT DIE GEBOSE
WILGE TERREIN VRY IS VAN
STEENKOOI-RESERWES, EN WORD
DIE MINERAAL REGTE NIE BESIT DEUR
MYNHUISE NIE.

DIE WILGE TERREIN GEE TOEGANG
TOT DIE STEENKOOI-RESERWES VAN
KENDAL TOT BALMORAL EN VAN
OGIES TOT WAKEFIELD EN DIE
KROMDRAAI KOOIMYN-KOMPLEKS.

DIE WILGE TERREIN IS IN LOOP-
AFSTAND VAN DIE PHOLA DORPSGEBIED
EN IS DIE PAARIE MEER TOEGANKLIK
AS DIE KENDAL OPSIE - 'N DUBBEL
PAD VAN WILGE TOT BY (OGIES) OF
PHOLA SAL GOED WEES.

DAAR IS NIE STREEK-KOOI-VRAGMOTOR
VERKEER OP DIE WILGE PAD NIE
(GEDEELTE VAN R565)... DAAR IS WEL
VERKEER TUSSEN KLIPSPRUIT KOOIMYN
EN RIETSPRUIT KOOIMYN (KRIEEL) MAAR IS
VAN TYDELIKE AART.

DIE OPMERKING KAN GEMAAK WORD DAT
DIE KOOI-RESERWES NADER AAN WITBANK
IS VAN UITVOER GEHALTE IS. EN DUS
DUURK.

MISVORMING "FOG" IN DIE OMGEWING VAN WITBANK EN MEER SPESIFIEK OP DIE N12 NABY WITBANK REG OOR BLACKHILL. DIE MIS WORD VERERGER DEUR MYNBOU-STOF-DEELTJES WAT IN DIE LUG HANG.

DRAMATIESE ONGELUKKE MET STERFTES VINNIG OP DIE DEEL VAN DIE N12 PLAAS. EN WORD VERKEER MET DIE OU WITBANK PAD VIA BLACKHILL HERLEI. HIERDIE PAD IS IN FODDE EN IS DAAR AL VIR DIE LAASTE 10 JAAR "POTHOLE" WAARSKYNS BORDE OP. KENDALSTASIE WERKNEMERS IS GENDOP OM HIERDIE PAD TE GEBRUIK WANNEER REEL ESKOM. DAT DIE STAAT IN RAT KOM EN DIE PAD HERSTEL EN OPGRADEER. DIE NK TUSSEN BALMORAL EN WITBANK IS NIE SONDER ONDERWORPE AAN BESOEDELING EN "FOG" NIE.

DIE GRONDFORMASIE SUID VAN KENDAL VERANDER NA TURF EN IS NIE TE AANBEVEEL VIR ONTWIKKELING NIE.

SO TERLOOPS WANNEER BOU ESKOM N STEENKOOI-SPOORLYN NA LEKWE OM DIE VERNIETIGING VAN PAAIE MET VRAGMOTORS TE STOP

Die grootste probleem wat ek met die voorgestelde kragstasie het is dat die lug in die hêveld streek reeds baie besoedel is deur industriele huishoudelike verbrandings metodes. Al word daar vooraf moniteering gedoen, sal ons nie werklik kon sê tot watter mate die kragstasie gaan bydra tot die bestaande lugbesoedeling probleem nie. Die uitlatings van die stasie kan nog binne die permit vereistes val, maar wat van die totale bydrae wat dit tot die besoedeling maak. Lugbesoedeling het nie grense nie en dit kan ook in my gebied strek!

Dankie vir u tyd

Vik Cogho Jogwe	Po Box 13143 Lematfontein 1038	013 689 3178	013 689 3179

PLEASE LIST ANY PRELIMINARY COMMENTS, ISSUES OR CONCERNS WHICH YOU MAY HAVE:

* Currently as indicated on figure 1 site B falls within the current/planned Klipspruit mining area. How will this dev impact on the mining operations?
 * Air pollution already common on highway what will be done to minimise impacts of the new power station - especially so?
 * Given the locations of both sites, especially Site B to the N12 (JHB - Witbank freeway) how will dust from the ash dumps be controlled so as to not effect visibility in the area?
 * New power stations source of water should be clarified - catchment already water scarce. Where will the power station obtain its water and what water conservation techniques will be implemented, if any.

Thank you for your time

Its a GREAT Project that Eskom planning to do it will help in alleviating the poverty and help unemployed to be employed
As wilge residents we are indeed very happy to hear about this project as it will also help to uplift our economy and hoping that in future we will be informed if any progress may appear.

Thank you for your time

PLEASE LIST ANY PRELIMINARY COMMENTS, ISSUES OR CONCERNS WHICH YOU MAY HAVE:

As signatory to the Kyoto Protocol, South Africa has indicated its intention to reduce actions which contribute to global warming, including the reduction of the level of carbon dioxide emissions. Regarding Eskom and the South African commitments to the Kyoto Protocol:

1. What authority or entity in South Africa is responsible to manage and reduce Eskom's carbon emissions in line with the national commitment?
2. What is the current Eskom carbon balance?
3. What is the planned carbon balance for the proposed new Witbank power station?
4. What is the planned 20 year Eskom carbon balance according to the ISEP plans?
5. How do these plans support the South African commitments towards the Kyoto Protocol, specifically in terms of the reduction of carbon emissions?
6. According to the ISEP, what proportion of the Eskom's generation capacity and capital budget is earmarked for the construction of non-carbon emitting generation capacity and when?

PLEASE LIST ANY PRELIMINARY COMMENTS, ISSUES OR CONCERNS WHICH YOU MAY HAVE:

- It was said that 5 possible locations had been looked at but the site weighting applied had reduced this to two locations. These calculations should be published for all sites.
- It is unacceptable that in such a major project involving large open-cast mining expansions for example that all possible environmental impact possibilities are not examined in a total integrated system. If this was to be done including I may add, the land rehabilitation after mining (A sorry story in this area!!) total different siting may result.
- There seemed some doubt that enough water would be supplied for Sulphur products to be removed. Can we be assured that in this new Power Station Sulphur products will be removed. Thank you for your time

Whilst I am obviously not happy with the idea of having to sell my farm, I accept that this may be inevitable. With effective planning, pollution from the ash tip can be minimised. I am totally opposed to the possible second location of the power station. This would be on the banks of a significant water course, the Vilde River and it will not be possible to prevent contamination and pollution from the ash tip if this location is chosen.

Thank you for your time

I strongly object to the siting of this Power Station for the following reasons:-
a) it will have an adverse effect on the environment & ecology of the area,
b) the area selected is already inundated with power stations and the pollution which follows
c) the power station will contribute to the already dangerous green house gases in the area

Thank you for your time

Messrs. Ninkam Shand.

RE. PROPOSED COAL-FIRED POWER
STATION AND ASSOCIATED INFRA-
STRUCTURE IN THE WITBANK
AREA.

On behalf of the residents
and public of Kromaat
Mittank I submit for your
kind consideration the following
suggestions which we believe will
be of mutual benefit to both
KAKOM and the whole community.

1) EMPLOYMENT OF LOCAL PEOPLE:
We request that preference be
given to the employment during
all phases of the construction
and subsequent operation of all
classes of employees from the
local community. There is a
great wealth of human resources
in this area and some inhabitants
have been associated with
KAKOM.

2) TRAINING OF PROSPECTIVE
EMPLOYEES. As a retired

ESKOM Human Resources forcast and
 I realize that ESKOM H. R.
 training can greatly benefit
 employees, the wider community
 and ESKOM. I believe that
 where skills are still lacking
 but the willingness to learn
 is displayed, ESKOM's fine
 training record can perform
 the transition to meaningful
 contribution to the efficient
 generation of electricity.

3. UTILISATION OF LOCAL SERVICE
 PROVIDERS. I submit a plea
 for local service providers of
 all classes to be used to
 provide the needs of this
 project. This could involve
 the dissemination of information
 standards and requirements to
 enable suppliers to render a
 top quality service.

4. CAREFUL MONITORING OF ALL
 ASPECTS OF ENVIRONMENTAL IMPACT

The constant surveillance of
 the impact of this major
 undertaking on the environ-
 ment, it is sadly true
 that Witbank suffers greatly
 from the pollution in many
 spheres of the environment.
 We trust that ESKOM will

become a leader in the field
in this area to set an
example in the cleaning up
of the atmosphere, also on
behalf of generations to come
I wish ESKOM success
with this venture which is
both essential and we believe
will be beneficial to South
Africa.

~~H. O. M. M.~~

Dear Ms Gaika

Proposed Coal-Fired Power Station And Associated Infrastructure In The Witbank Area: Notification Of New Sites For The EIA Process

Your letters dated 14 July and 07 August 2006 refer.

The conditions as stated in our letter dated 28 June 2006 for the sites A and B are still applicable to the proposed new sites X and Y. In our perspective, site X is recommended as preferable and most suitable to us because it would have minimal effect on our pipelines. Site Y would certainly affect the route of our proposed new NMPP pipeline as depicted on the attached topographical extract drawing.

We request that all EIA matters concerning this proposal be discussed with our Mr Joe McMahon, as previously stated.

Should you need more information, please contact the undersigned. We appreciate your awareness of the existence of the Petronet pipeline servitudes and concern for their integrity.

Yours Sincerely

M. T. Hadebe

Attended Meeting at El Toro Conferana Centre
on 2006-09-05 18h00-20h00. A number of issues
were raised which will be in the minutes of
the meeting, these will be sent to us. The
most important issue is how livestock production
and egg production will be affected by a
power station. Noise, dust, and water quality
are major factors. The organisation has
invested a vast amount since the closure
of the previous coal mines.

Thank you for your time

Subject: Fwd: PROPOSED COAL FIRED POWER STATION IN WITBANK AREA

>>> "Malcolm Suttill" <malcolms@lantic.net> 08/09/2006 9:00:56 PM >>>

Attn. Karen Shippey

From Malcolm Suttill

Chairman Witbank Branch of the Wildlife and Environment Society of SA.

PROPOSED COAL FIRED POWER STATION IN WITBANK AREA

I have passed comments on to our Regional office in Johannesburg (Ms Carla Hudson - Regional Manager) and asked them to take this project up with our National office as I believe we are quickly being steam-rolled into a position of no return on a project with major pollution potential. The last public meeting at the Witbank Protea was, we believe, arranged at short notice and then we were pushed on a time basis. Not what is required on such a major project!!

(Please note these comments are at this stage those of this Branch and not of WESSA as a whole. The Society may or may not wish to be further involved.)

What are the problems with all these proposed Coal-fired Power Stations?

There does not appear to be any good argument coming forward as to the alternatives in major generating capacity. There is talk in the near future of power from gas, wind, water and solar power and also imports of electricity from Zambia, Congo and even Botswana (but this will need a Coal Fired power station on our doorstep!) However all of these relatively minor sources will be a drop in the ocean compared to our increasing needs for electricity. The likely write off of some of our aging power stations in the not too distant future adds to the problem. The only short-term alternative to Coal-fired appears to be Nuclear whether conventional or Pebble Bed. Are we agreeing that these huge polluters are the only current alternative? There is a lot of emotion about nuclear power and nuclear waste but in general it is just emotional, not fact There will never be another Chernobyl and most scientists think nuclear power is the compromise way to go at this moment in time. WHY ARE WE NOT BUILDING CLEAN NUCLEAR POWER PLANTS INSTEAD OF THESE LARGE POLLUTERS? ESKOM APPEAR TO BE TAKING AN EASY WAY OUT. ESKOM'S ARGUMENTS ON THE COAL-FIRED ROUTE ARE NOTED BUT THEY DON'T SAY WHY WE ARE NOT GOING NUCLEAR AS A MATTER OF EXTREME URGENCY. COSTS AND TIME FRAMES ETC. OF ALTERNATIVES SHOULD BE MADE AVAILABLE

WE SHOULD HAVE MORE FACTS AT THE BASIC LEVEL OF COAL-FIRED V NUCLEAR BEFORE WE ALLOW THESE UNITS TO BE BUILT.

Moving on to this project.

The environmental assessment process involved for such a project is, I believe sadly, flawed. There

is not an integrated environmental process for the whole project. For example the mine, which will supply 15 million tons p.a, will involve a totally separate environmental process. I am not sure where the water supply and pipelines come into the equation but they are a critical part, the primary cooling etc taking 30 million tons of water per annum. The problem is that each could have a major impact on the other but this will not necessarily be apparent with separate environmental processes. Can all the environmental processes be integrated, as one cannot work without the other?

I UNDERSTAND SEPARATE EIA'S ARE ALLOWED FOR WHAT IS PART AND PARCEL OF THE SAME PROJECT. THIS IS SURELY RIDICULOUS IF CORRECT. HOW CAN YOU HAVE A COAL-FIRED POWER STATION WITHOUT COAL?

Eskom seems to have determined that they will spread the three units to three different coalfield complexes. This means that all that has to be done in the Witbank area is to find two or three "best fit" sites in the area. There seems to be no question that Witbank may not be the best area. This needs to be examined. We believe we are already overpolluted. WHERE ARE THE FIGURES? DOES THIS POWER STATION HAVE TO BE IN THE WITBANK AREA AT ALL? WE NEED TO SEE THE DETAILED ARGUMENTS HERE.

Eskom talked of a major effort to reduce power usage by Government and themselves, and talk of a high degree of success in the Cape. A big effect is peak power requirements, smooth out the graphs and there are different and lower requirements. We the ordinary citizens here have not been subjected to any such major campaign. Maybe major industries have but if so that doesn't also seem to have got through to Municipalities. (Is Government going to run this like their anti-AIDs campaign one wonders?) A POWERFUL NATIONWIDE CAMPAIGN IS ESSENTIAL AS ARE WAYS AND MEANS OF SMOOTHING PEAK PERIODS. THIS IS SURELY POSSIBLE WITH CONCENTRATED EFFORT.

There is also the projected life of existing power stations and projected power requirements. The question is how accurate are the projections for future requirements? Should these not be given more close scrutiny? WE SUGGEST AN INDEPENDENT AUDIT OF ESKOM'S (AND GOVERNMENTS) PROJECTIONS HERE. IT IS SO IMPORTANT TO US ALL.

Greenhouse gasses are hardly given a mention as it is considered that the only option is coal-fired power and therefore carbon dioxide is a given! Eskom think any way of handling carbon dioxide in sinks etc are faint possibilities far in the future. Our children may not be so sanguine about this in years to come!! THIS IS GLOSSED OVER BUT THE WORLD SEEMS TO THINK CARBON STORAGE WILL BE POSSIBLE. WHAT IS THE CURRENT POSITION ON CARBON STORAGE? IF NOT AVAILABLE NOW CAN THIS BE ADDED ON TO THE POWER STATION LATER IF FEASIBLE OR ONCE BUILT WILL THEY GO TO ATMOSPHERE, WITH CO2, FOR LIFE?

With regard to the sites chosen here and this project

Ninham Shand Consulting Service has come up with some weighting factors for the sites they have selected. One of the major factors was said to be air pollution but how this was brought in and where the information came from was not clear. THIS IS NEEDED IF WE ARE TO EXAMINE THE

ARGUMENTS FOR SITE SELECTION. FROM THE DRAFT SCOPING REPORT IT WOULD SEEM THAT THIS AIR POLLUTION DATA IS STILL BEING COLLECTED. IF SO HOW WAS AIR POLLUTION ONE OF THE CHIEF CRITERIA AS SAID AT THE RECENT MEETING?

We are not convinced that Eskom is planning to take as much of the Sulphur oxides out of the gases going to atmosphere as possible, as this could involve a higher water usage and cost. WHAT ARE THE PLANS? WE BELIEVE SULPHUR LEVELS ARE ALREADY VERY HIGH ON THE HIGHVELD. CAN WE SEE SULPHUR FIGURES AND PROJECTIONS WITH THE NEW POWER STATIONS ADDED IN?

The question of mining pollution of land, air and water is not being considered in depth at this moment as this will be a future separate EIA process. But of course once the power station gets the go-ahead mining has to go with it, so no real discussion is there? THE EIA'S HAVE TO GO TOGETHER OR ONE OR OTHER EIA WILL BE SOMETHING OF A MOCKERY WILL IT NOT!

A positive point for such a project is that this will give more employment in the area. Long term this will probably be little and then mainly of highly skilled people, even in the ancillary and supply areas. In the construction phase, there should be some jobs, but there are probably less and less unskilled labour requirements in such projects. (It would be much better to concentrate on such things as tourism for helping employment. Many more people are employed in this industry for a fraction of the cost of these major enterprises. The authorities should do much more in this field than they are doing) THE LIKELY JOBS FOR UNSKILLED PEOPLE AT CONSTRUCTION AND OPERATING STAGES SHOULD BE CLEARLY STATED

The Draft Scoping Report says DWAF has said water will be supplied. However it does not seem clear exactly how much water will be needed for all the new power stations and whether we really are in a position to supply the needs of this whole Northern Region with sufficient water for at least, say, the next 25 years or more. We are constantly being told we are soon going to be running out of water. THE QUESTION OF WATER IS FAR FROM CLEAR, MORE DETAILS ARE NEEDED WITH PARTICULAR REFERENCE TO THIS PROJECT.

The question of people and graves on sites selected is going to be a source of worry to quite a lot of people. THIS PROBLEM NEEDS TO BE FULLY IDENTIFIED WITH NUMBERS AND SITES

There are of course all the other aspects to consider and the specialist studies are awaited on these.

Malcolm Suttill

Hi Karen

Do you perhaps know who is involved in this project so that I can forward this mail to them?

Thanks
Belinda

>>> <jlatilla@lantic.net> 06/09/2006 08:26:09 PM >>>
Submitted from the NS website...

I ONLY FOUND OUT ABOUT THIS PROPOSED DEVELOPMENT TODAY FROM A THIRD PARTY, MY PROPERTY LIES ONLY 3KM FROM ONE OF THE PROPOSED SITES AND I AM AFRAID THAT I WILL BE NEGATIVELY AFFECTED BY ALL OR SOME OF THE FOLLOWING; NOISE, AESTHETICS, DUST, GROUND VIBRATION, SECURITY THREATS DUE TO INCREASED NUMBER OF PEOPLE IN THE AREA. I AM CONCERNED THAT THE VALUE OF MY PROPERTY WILL DECLINE STEEPLY.

DOES ESKOM HAVE PLANS TO BUY OUT MY PROPERTY IF IT'S VALUE IS REDUCED OR IF MY QUALITY OF LIFE IS NEGATIVELY AFFECTED?

WHERE EXACTLY WILL THE POWER STATION BE SITED? SITE Y IS 12KM AWAY AND WOULD BE FAR MORE ACCEPTABLE FROM MY POINT OF VIEW.

I am worried about environmental negative impacts such as:
Aesthetics, Noise, Dust, Ground vibration, Traffic, Mining, Blasting, Groundwater loss and security problems associated with more people in the area.
The one site is as little as 3 km from my farm and could thus lead to it being very unpleasant to continue living there.
I am worried that my property value will drop or that I will be unable to sell if I want to.

Does Eskom have a contingency plan to buy out land owners who are negatively affected by this development? Thank you for your time

- Our farms are our "bread and butter" what will happen to our quality of life and our livelihoods?
- The farmers of the area need to have a meeting to discuss this amongst ourselves.
- Fire are also a concern - ~~also~~ increase in frequency Along paths between infrastructure (Power Station & Mine) fires are started and will spread.
- Very unhappy with the rush job being undertaken. Landowners ^(x and Y sites) were only informed a month ago and now expected to by 15 Sept come up with all issues - haven't had time to get to grips with project.

Process is being forced down our throats.

Escom had lots of time to approach us after Gov. told them to build a new Power Station in 2004. They knew where the coal was and should have started talks much earlier.

Farmers need years to plan in advance so the timing of the study and the extremely short notice is unacceptable.

Soos verneem met die inligtings versadering is ek in terrein X wat op hierdie stadium 'n ekonomiese eenheid is. Volgens inligting benodig Eskom 'n gedeelte van die ekonomiese eenheid. Hiermee wil ek ander u aandag bring dat dit 'n onekonomiese eenheid gaan wees wat 'n groot impak op ny boerdery sou meebring indien ek net 'n gedeelte sou betoel.

Dankie vir u tyd
