

ENVIRONMENTAL IMPACT ASSESSMENT

ISSUES TRAIL 1

**PROPOSED CONSTRUCTION OF A COMBINED CYCLE GAS TURBINE (CCGT) POWER PLANT IN THE
AMERSFOORT AREA, MPUMALANGA PROVINCE**

JUNE 2008

INDEX TO ISSUES IN THIS TABLE

- 1. LOCATION SITE COMMENTS AND CONCERNS**
- 2. TIMEFRAME ISSUES**
- 3. SOCIAL ISSUES AND COMMENTS**

Issue/Comment	Raised By	Response
<p align="center">1. TECHNICAL COMMENTS AND CONCERNS</p> <p align="center">SCOPING PHASE</p>		
1.1	<p>Mr. de Jager, Pixley Municipality Focus Group Meeting, Pixel ka Seme Local Municipality, 8 February 2008</p>	<p>No, the CCGT plant will not be in Majuba PS. Instead, a ten kilometer radius around the current Underground Coal Gasification was identified for locating the CCGT plant, and that the ideal site will be determined through the environmental impact assessment and feasibility studies. One of the sites to be investigated during the Scoping process, is adjacent to the current Majuba Power Station. Mr. Morore Mashao, Eskom</p>
1.2	<p>Mr. de Jager, Pixley Municipality Focus Group Meeting, Pixel ka Seme Local Municipality, 8 February 2008</p>	<p>The mining site has been identified as a potential site for the location of the CCGT plant, at the site selection process, but the EIA process will determine which sites are suitable. Mr. Morore Mashao, Eskom</p>

	Issue/Comment	Raised By	Response
1.3	The amount of sites to be investigated for the proposed project	Mr. Gift Kgoebane, Pixley Municipality Focus Group Meeting, Pixel ka Seme Local Municipality, 8 February 2008	Ten (10) sites were identified during the screening exercise but six (6) sites have resulted from the scoping phase. This result is because the other four (4) sites may be used for extension of the UCG operations in the future. At the end of the scoping phase, three (3) sites will be recommended for specialist investigations in the EIA phase. At the end of the EIA phase, the specialist EIA studies will identify and highlight the preferred site in terms of environmental assessments. Mr Tobile Bokwe, Eskom

	Issue/Comment	Raised By	Response
1.4	<p>Please would you ensure that the Scoping Report provides for investigation of the options for renewable energy hybrid / add-on to this plant, incl. using concentrated solar thermal energy to pre-heat air and thus improve the electricity output per unit of fossil fuel input; including the benefits for rates of emissions per unit of output.</p> <p>This should be covered and would provide a basis for appeal if it is not rigorously investigated (i.e. not good enough to have some sort of dismissive statement on status of the technology).</p>	<p>Mr. Richard Worthington Sustainable Energy and Climate Change Project Co-ordinator Earthlife Africa Jhb, Email, 11 March 2008</p>	<p>The usage of concentrating solar power is being rigorously researched and developed in another proposed Eskom pilot project. Once proven as a suitable technology for local application, additional concepts may be investigated. The CSP systems aimed at direct air heating are still under research and development internationally (i.e. the volumetric air receiver). As far as including a solar thermal electric option is concerned, the Integrated Solar Combined Cycle System Concept calls for part of the heat recovery steam generator (HRSG) to be either replaced or paralleled by equipment serviced by solar thermal energy to supplement turbine exhaust gases.</p>

Issue/Comment	Raised By	Response
1.5	<p>Mr. Richard Worthington Sustainable Energy and Climate Change Project Co-ordinator Earthlife Africa Jhb, Email, 14 March 2008</p>	<p>This approach increases thermal energy input which produces more electrical output. However, this option will not be cost competitive with the initiative mentioned earlier in this response, hence the focus of Eskom's pilot project. The Amersfoort area is further considered as a moderate solar resource area within SA. DNI values for this area centre around 6kWh/m²/day compared with values in excess of 8kWh/m²/day in the Northern Cape.</p>

	Issue/Comment	Raised By	Response
1.6	<p>Can you provide any justification for the fuel supply not being included in the ambit of this EIA? It is our view that fuel supply impacts must be taken into account when assessing a power station.</p>	<p>Mr. Richard Worthington Sustainable Energy and Climate Change Project Co-ordinator Earthlife Africa Jhb, Email, 14 March 2008</p>	<p>With regard to the justification for the fuel supply not being included in the ambit of this EIA, the combustible synthetic gas from the Underground Coal Gasification (UCG) plant in the Majuba area will be used as fuel for combined cycle gas turbine (CCGT) technology and potential co-firing with coal in the Majuba power station, thus the development of a UCG-CCGT power complex. The mining right for the UCG plant falls under the ambit of another application process required by the Minerals and Petroleum Resources Development Act (Act 28 of 2002) and thus the power generation project only focuses on the CCGT plant component (NEMA EIA Regulations).</p>

	Issue/Comment	Raised By	Response
1.7	<p>The BID is misleading in its contention that "first stage in the process of electricity production through the CCGT plant."</p> <p>The first stage is the underground gasification of coal, to produce gas to run the plant.</p>	<p>Mr. Richard Worthington Sustainable Energy and Climate Change Project Co-ordinator Earthlife Africa Jhb, Email, 14 March 2008</p>	<p>Bohlweki Environmental does agree that the information contained in the Background Information Document (BID) can be misconstrued; however, this comment should be placed in context. As the scope of our work is for the proposed development of the CCGT plant, the first stage in the process of electricity generation in the CCGT plant is through the gas turbine.</p>

	Issue/Comment	Raised By	Response
1.8	<p>It is also disingenuous to make no reference to the location of the underground gasification of coal in consideration of project siting</p> <p>Please would you indicate the status of any approval of the Underground Coal Gasification process to supply gas.</p> <p>Please also confirm receipt of our submission that all the opportunities for designing and constructing the plant for hybrid use of renewable energy to improve efficiency and reduce emissions factors need to be investigated within the EIA process.</p>	<p>Mr. Richard Worthington Sustainable Energy and Climate Change Project Co-ordinator Earthlife Africa Jhb, Email, 14 March 2008</p>	<p>During the Screening Study, a 10km radius was demarcated (as this took into account the distance of the gas pipeline from the UCG plant to the CCGT plant) around the UCG plant for selection of feasible sites for locating the CCGT, and specialists (hydrogeology, hydrology, biodiversity, air quality, noise, visual and risk) compiled a sensitivity map indicating ideal, acceptable and sensitive areas within the study area that could accommodate the CCGT plant.</p>

Issue/Comment	Raised By	Response
		<p>For the full Screening Report). Ten sites were identified as being feasible sites for the construction of the CCGT plant. After further site selection and screening workshops, four sites were eliminated as they occur in areas above valuable coal resources earmarked for future expansion of UCG operations.</p> <p>Mr. Malcolm Roods, Bohlweki Environmental</p>

	Issue/Comment	Raised By	Response
1.9	Enquired why a gas turbine can not work throughout the night.	Mr. Eddie Deacon, landowner, Focus Group Meeting, 06 March 2008	Indicated that technically it was possible, but that operational costs would be enormous to do so (determined by the pricing of fuel). Gas was operated at R250 per Megawatt. Gas-fired turbines are less expensive to operate than diesel or kerosene-fired turbines. Gas is a more affordable fuel. Eskom Team
1.10	Wanted to know whether energy saving light globes were used by Eskom at the power station.	Mr. Johan Deacon, landowner, Focus Group Meeting, 06 March 2008	Eskom has currently embarked on an efficient lighting project to address this concern. Mr. Rudi van der Wal, Eskom
1.11	Enquired if the turbines will be located together or far apart.	Mr. Johan Deacon, landowner, Focus Group Meeting, 06 March 2008	The turbines will be located close together. Mr. Rudi van der Wal, Eskom

	Issue/Comment	Raised By	Response
1.12	Concerned that the proposed project could possibly cause acid rain.	Mr. Johan Deacon, landowner, Focus Group Meeting, 06 March 2008	It was indicated that the Combined N _{ox} Emission is less than 100 with the utilization of gas and this is much lower as for the current power station. It was further indicated that an air specialist will look at these concerns during the EIA and comment on it. Eskom & Bohliweki Project Team
1.13	It was indicated that there are blue cranes in the area that should be taken into consideration.	Mr. Johan Deacon, landowner, Focus Group Meeting, 06 March 2008	It was indicated that this will be taken up together with other specialists studies, etc. He referred the attendees back to the list of specialist being used. Mr. Nico Gewers, Eskom

	Issue/Comment	Raised By	Response
1.14	Asked what the lifespan of the proposed plant would be and if it is dependant on the coal availability.	Mr. Johan van Niekerk, Department of Water Affairs and Forestry (DWAF), Key Stakeholder Workshop, 07 March 2008	It was replied that the lifespan of the plant will be for 25 years. Currently Eskom could look at possibilities to extend the lifespan of the plant but the economic factors are also taken into consideration. He confirmed that the lifespan of the project is dependant on the coal availability and thus gas production. Mr. Morore Mashao, Eskom Generation
1.15	Enquired if the lifespan is completed, will the CCGT then be moved to another site.	Mr. Johan van Niekerk, Department of Water Affairs and Forestry (DWAF), Key Stakeholder Workshop, 07 March 2008	It was indicated that the site identified will be used for the power plant only. Dr Mark van der Riet, Eskom
1.16	Asked if site one is owned by Eskom?	Mr. Neels du Toit, Department of Economic Development, Key Stakeholder Workshop, 07 March 2008	It was answered that Site 1 is the farm Palmietspruit and owned by a private land owner, but that sites 3a & 3b are owned by Eskom. Ms. Prashika Reddy, Bohlweki Environmental

Issue/Comment	Raised By	Response
1.17 Asked if the proposed plant will be running peak hours only.	Mr. Neels du Toit, Department of Economic Development, Key Stakeholder Workshop, 07 March 2008	Answered that the proposed power plant will be flexible to run 24hrs if needed. Mr. Nico Gewers, Eskom
2. TIMEFRAME ISSUES		
SCOPING PHASE		
2.1 When the operation will take place	Mr. Vusi Maseko, CDW Focus Group Meeting, Pixley ka Seme Local Municipality, 8 February 2008	Plan is to have it operational within the next two years. Mr. Morore Mashao, Eskom
2.2 When will the project start being functional	Mr Giff Kgoebane, Focus Group Meeting, Pixley ka Seme Local Municipality, 8 February 2008	Project has moved into a feasibility phase. At the moment, Eskom does not have exact details but by 2011 Eskom plans to have the first units of the project functional. Mr. Morore Mashao, Eskom

	Issue/Comment	Raised By	Response
2.3	<p>Remarked that the original gas project made use of coal and with regards to the timeframe why propose this new project.</p>	<p>Mr. Charles Hodsdon, landowner, 06 March 2008</p>	<p>It was indicated that the original gas project will not be able to supply additional power but that with the Majuba Combined Coal Gasification Project additional power will be supplied. It was indicated the timeframe for implementation of the CCGT will be 36 months.</p> <p>Mr. Morore Mashao, Eskom</p>

Issue/Comment	Raised By	Response
3. SOCIAL ISSUES AND COMMENTS		
SCOPING PHASE		
3.1	<p>Job opportunities</p> <p>Ms Mapaseka Madonsela, Executive Mayor Focus Group Meeting, Pixley ka Seme Local Municipality, 8 February 2008</p>	<p>The project has limited scope of work for manual workers, and the nature of the work involved does not cater for a huge number of jobs. However, there is a small number of people to be permanently employed in the plant. In the year 2011 the numbers are anticipated to grow to 1000 as there would be higher labour requirements. The whole process of employment issues will be guided by the Accelerated Growth Initiative for South Africa (ASGISA). The contractor will also play a role in terms of employment.</p> <p>Mr. Morore Mashao, Eskom</p>
3.2	<p>Emission gasses, what will happen to them</p> <p>Focus Group Meeting, Pixley ka Seme Local Municipality, 8 February 2008</p>	<p>These will be minimized as much as possible. The EIA studies will look into all environmental impacts. The environmental management plan will manage the impacts and suggest mitigation measures.</p> <p>Mr. Morore Mashao, Eskom</p>

	Issue/Comment	Raised By	Response
3.3	Stakeholder involvement, who are they	Mandla Shabangu, Community Development Worker Focus Group Meeting, Pixley ka Seme Local Municipality, 8 February 2008	There is a focus group meeting for provincial authority that has been scheduled. Relevant government officials would be invited to the meeting to obtain their comments. Ms. Nicolette Raats, Bohlweki
3.4	Impact on the agricultural industry	Mr Vusi Maseko Focus Group Meeting, Pixley ka Seme Local Municipality, 8 February 2008	This aspect will be addressed during the EIA looking at the agricultural potential and suggesting mitigation measures. Mr. Nico Gewers, Eskom
3.5	Mentioned that the area is the second highest polluted area in South Africa	Mr Leon Grove Focus Group Meeting, Pixley ka Seme Local Municipality, 8 February 2008	Eskom is in constant contact with DEAT and are aware of the air quality issues in the area. Appropriate mitigation, also accepted by the authorities, will be implemented to ensure a safe living environment. Mr. Nico Gewers, Eskom
3.6	The venue for the meeting is too far. He was invited in a very short space of time; Who would pay for the cost he would incur; Not prepared to drive those roads that late as it was dangerous (infact the previous week there was an accident and people died).	Mr. Piet Venter, Landowner, 12 March 2008	Comments and Concerns Noted

	Issue/Comment	Raised By	Response
3.7	The proposed project will help provide employment for the community, natural protection and development of the area	Mrs Lindiwe Jobela, Amersfoort, comment form, 12 March 2008	Comments and Concerns Noted
3.8	The project should look at Daggakraal because of poverty and lack of jobs.	Mr Thokozani S.A Minisi , Vlakpoort, comment form, 12 March 2008	Comments and Concerns Noted
3.9	The project should look at Daggakraal before employment is provided in Majuba	Mr Vusi Ndlovu, Vlakpoort, comment form, 12 March 2008	Comments and Concerns Noted
3.10	Want to be part of construction so to get employment	Mr Alfred Mfanifani Ngwenya, Daggakraal, comment form, 12 March 2008	Comments and Concerns Noted
3.11	I would like to see the project creating job opportunities in the area of Amersfoort and surrounding area. Secondly, I wish to see the town of Amersfoort being developed and lastly will the project do something in connection with air pollution and help not to affect our communities.	Mr Sipho S Khoza, Amersfoort, comment form, 12 March 2008	Bohlweki –SSI air quality unit is conducting the air quality studies. The specialist will report on the findings of the air quality of the area and give recommendations during the EIA phase. Ms. Sibongile Hlomuka, Bohlweki Environmental

	Issue/Comment	Raised By	Response
3.12	I support this project because it will decrease the rate of unemployment.	Miss Delisile Mathebula, Vlakpoort, comment form, 12 March 2008	Comments and Concerns Noted
3.13	I expect job creation and development	Miss Sonto Johannah, Amersfoort, comment form, 12 March 2008	Comments and Concerns Noted
3.14	I wish to know to whether this project will require general workers or qualified individuals and the method that will be used to appoint people	Lindiwe Ngwenya, Amersfoort, comment form, 12 March 2008	Comments and Concerns Noted
3.15	I would like to see development and job creation	Miss Thoko Thwala, Amersfoort, comment form, 12 March 2008	Comments and Concerns Noted
3.16	I would like to see development and job creation.I support this project so that the rate of unemployment will decrease.	Miss Rostah Mathebula, Amersfoort, comment form, 12 March 2008	Comments and Concerns Noted

	Issue/Comment	Raised By	Response
3.17	People who are taking part in these meetings should be given certificates to show that their attendance is appreciated.	Miss Ntombikayise Kubheka, member, Amersfoort, comment form, 12 March 2008	The purpose of inviting people to the meetings is to inform them about the proposed project. This consultation process is part of public participation which is required as part of the environmental studies to obtain authorization from the Department of Environmental Affairs and Tourism (DEAT). For these kind of meetings there are no certificates of attendance issued. The consultants keep the attendance record as proof of the meeting conducted and keep the record of attendees.
3.18	Supervisor positions should be available for young people who have recently completed their courses because we are suffering to get tenders in our area. Opportunities for matriculants who have passed to be assisted with bursaries and training.	Mr. Mabhudi Veles Nkosi, Technical electrician, comment form, 12 March 2008	Ms. Sibongile Hlomuka, Bohlweki Environmental Comments and Concerns Noted
3.19	The project should not only focus on the individuals that are educated only, the less educated should also be considered	Mr Smanga ,Viakpoort, comment form, 12 March 2008	Comments and Concerns Noted

	Issue/Comment	Raised By	Response
3.20	There should be opportunities for people who have matric to be trained and acquire skills for certain opportunities that exist at the moment.	Mr Mdluzi Welcome Mngomezulu, Vlakpoort, comment form, 12 March 2008	Comments and Concerns Noted
3.21	Whether the proposed development will affect my property rights	Drie Susters Boerdery, landowner, Standerton. Comment & Registration Form, 12 March 2008	Comments and Concerns Noted
3.22	The project will boost the economy and the employment rate	Shereena Mahabeer, Volksrust, Comment & Registration Form, 12 March 2008	Comments and Concerns Noted
3.23	Would like to subcontract for the project and currently a manager for the public works construction between Amersfoort and Daggakraal. Specialise in concrete work, security, bridges, building and plumbing	Mr. Stanley Motha, Vlakpoort, 12 March 2008	The tender opportunities will be advertised on the national newspapers and all tenderers are welcome to submit their proposals and follow the necessary procedures.
3.24	It is for the first time that Eskom recognizes their area in their employment plan	Mr. Mandla Nhleko, Daggakraal, Comment & registration form, 12 March 2008	Comments and Concerns Noted

	Issue/Comment	Raised By	Response
3.25	<p>I am in particular interested in the source of gas to be utilised for the plant. My current understanding is this will be sourced via Underground Coal Gasification - from which coal reserve will this take place i.e. who owns the mineral rights and has an EIA / EMP been undertaken for this?</p> <p>I would also like to know how the CCGT impacts on the current Majuba Power station in so far as its current coal supply.</p> <p>Will it continue to utilise as per its current coal contracts or will these now be substituted by the UCG.</p>	<p>Ms. Sharon Clark, Environmental Co-ordinator BHP Billiton, Comment Form 12 March 2008</p>	<p>Currently Bohlweki SSI is conducting the EIA studies for the Majuba CCGT. The EMP will be drafted as part of the study.</p> <p>The CCGT will not impact Majuba coal resources, as the CCGT will be supplied with gas from a coal resource that could not be mined through traditional/conventional mining methodologies. Majuba does not use the gas, but coal sourced elsewhere.</p> <p>Majuba Power Station and the CCGT will be two separate power stations, fuelled by different fuel sources (coal and gas respectively). Majuba will continue to utilize the coal contracts.</p>

	Issue/Comment	Raised By	Response
3.26	<p>How will the water quality of boreholes and streams be affected</p> <p>Dealings with endangered mammals and corodylus lizard and blackcrane</p> <p>Farming activities will be affected especially on Palmietspruit</p>	<p>Mev. Hester van Loggerenberg , Drie Susters Boedery (BK), Comment & Registration Form, March 2008</p>	<p>SRK water specialists have been appointed to focus on water quality issues. Bathusi Environmental will conduct the ecology, flora and terrestrial flora.</p> <p>The agricultural studies will be conducted by the ARC. The specialist will give detailed results of the studies during the EIA phase.</p> <p>Mr. Malcolm Roods, Bohlweki Environmental</p>

Issue/Comment	Raised By	Response
<p>3.27 Why household applications for electricity connections should be done at Pietermaritzburg and why is such a long process</p> <p>Does Eskom see that to meet millennium goals is impossible due to its ignorance for electricity distribution</p> <p>On the premier's speech during the opening of Mpumalanga Legislature, it was indicated that government and Eskom are setting up a Provincial Energy Risk Management. How will this benefit the communities?</p> <p>As Eskom Management how possible will it be able to assist in electricity backlog and assist with free 50 kilowatts of electricity for the poor who still fail to access it as beneficiaries</p> <p>On a visit to South Africa by the French President, he indicated that on agreement signed (Memorandum of Understanding) they will assist South Africa to build new power station, one in Mpumalanga and the other in Limpopo. Where exactly</p>	<p>Councillor OT Shabangu, Zamokuhle, 06 March 2008</p>	<p>The concerns should be directed to the Gert Sibande District. These are issues that are dealt with at the municipal level. The consultants are not in a position to assist in any of the questions.</p> <p>Ms. Sibongile Hlomuka, Bohlweki Environmental</p>
<p>3.28 The project must provide training to the people before they are involved in the project</p>	<p>Mr. Xolani Simelane , Daggakraal, Comment & Registration Form, 01 April 2008</p>	<p>Comments and Concerns Noted</p>
<p>3.29 Career Opportunities in the school for learners around Amersfoort. Fight against unemployment.</p>	<p>Mr. T.V Pungwayo , Amersfoort Combined School, 08 February 2008</p>	<p>Comments and Concerns Noted</p>

Issue/Comment	Raised By	Response
3.30 Support the proposed project and hopes that there would be job opportunities created	Mr. Enoch Vliakazi, Volksrust ,February 2008	Comments and Concerns Noted
3.31 Supervisory positions should be available for young people who have recently completed their studies. We suffer in terms of getting tenders in the area. Matriculants should be assisted with bursaries or trainings	Mr. Mabhudu Nkosi, Technical electrician ,Registration and Comment Form, 07 March 2008	The tender opportunities will be advertised on the national newspapers and all tenderes are welcome to submit their proposals and follow the necessary procedures. Any arising opportunities will be given to local people only if they qualify.
3.32 To improve economic utilization to share the land and ensuring that poverty in the society is reduced. People and the area should be developed. Generate energy with our natural resources	Mr. Welcome Mngomezulu, Daggakraal, Comment and Registration Form, March 2008	Comment and Concerns Noted
3.33 Request for labour and consideration of unskilled skilled and semi skilled people. Job opportunities should be provided for people with with matriculation as they cant further their studies because of financial problems.	Liphatoana Edward Moloi, Traditional leader , Vlakpoort, March 2008	Comments and Concerns Noted
3.34 Will the proposed development affect property rights	Drie Susters Boerderry , Standerton , 19 March 2008	Comments and Concerns Noted

	Issue/Comment	Raised By	Response
3.35	Owner of the farm Koppieskraal and concerned about the environment	Mr. Izak Fourie, Amersfoort, Comment & Registration Form, 01 March 2008	Environmental impact assessment studies are being carried out. Will choose the site with minimum environmental impacts and/or one whose impacts can be mitigated the most.
3.36	Enquired what the impact would be on the surrounding land and how this land will be affected if not used for the project.	Mr. Charles Hodsdon Landowner, Focus Group Meeting, 06 March 2008	Mr. Malcolm Roods, Bohlweki Environmental The Specialists will identify and study the total impact of the project and this will feed into the Environmental Impact Report to identify the preferred area. This investigation is undertaken according to legislation and studies will be taken in detail. Mr. Nico Gewers, Eskom
