Dear Mr Mashao

**WATER SUPPLY TO THE PROPOSED GOURIKWA COMBINED CYCLE FACILITY**

This is to confirm that Eskom has approached PetroSA with the purpose of jointly investigating potential water supplies to the proposed Combined Cycle power generation facility, which is planned to be constructed at the Eskom Gourikwa power plant.

As discussed in our meeting, a number of options to supply water from the PetroSA facility are available. These options will be jointly investigated further, to determine if they are valid and viable.

We look forward to assisting Eskom in this regard.

Yours Faithfully

Michael Nene  
Operations Manager  
GTL Refinery
