

Business Rules for Virtual Wheeling

Application Fee

- An application fee will be payable before the processing of the application.
- This fee is a once-off non-refundable fee payable per application.

Contractual Relationship

- Eskom will not contract with the individual off-takers for such refund, only with the buyer.
- This includes municipalities; that is, there is no relationship between Eskom and the municipality for virtual wheeling.
- The municipal revenue will not be affected.

Refund Process

- A refund to the buyer will be based on a wholesale rate WEPs, excluding losses, as losses are payable.
- Refund will be calculated based on TOU Periods.
- Refund shall equal Total Energy consumed (Claimed per metered points).

Network Connection & Eligibility

- The off-takers can be connected to the High, Medium, or Low Voltage Networks.
- Where an Eskom-connected off-taker or a Municipality with municipal-connected off-takers is in debt to Eskom, there will be no wheeled energy refund processed for the wheeled energy associated with the off-taker until the Eskom account is in good standing.
- There is no avoidance of any tariff charges on each off-taker's account.

Eligibility Requirements

- **Eskom Connected End User** – Must be on a Time of Use tariff (measured in TOU periods).
- **Municipal Connected End User** – Eskom metering standard compliant in a “good standing” Municipal Area.

Data Requirements

- The buyer will be responsible for providing the data of all the municipal-connected off-takers in a format to be prescribed by Eskom.
- Required data includes:
 - TOU Summation data per metered point.
 - Detail Time of Use half-hourly reads per point (when requested).

Agreement & Amendments

- No updated deposits or amendment agreements to the supply agreement (of the Grid connected Customer) shall be required for virtual wheeling agreements.

Business Rules for Virtual Wheeling

- This Agreement shall be a transactional agreement.

Virtual Wheeling Monthly Fee

- A virtual wheeling monthly fee will be charged and published on the schedule of standard fees and will be determined by Eskom.
- This fee will cover:
 - The cost of the management of the contract.
 - All operations and processes to enable the Refund.
