

Use electricity smartly

Reduce **office energy** use to help curb loadshedding

It is as easy as 1, 2 ...6 to be **energy efficient at the office** with easy behaviour changes that are cost free

1  Use the cold water tap rather than using the geyser every time

2  When you leave the office, **remember** to switch off the lights

3  Only fill kettles with as much water as you need

4  Set air-conditioners' average temperature in winter at 20 C

5  Be energy efficient and change your light bulbs to energy efficient lights/LED's

6  At the end of the day, turn off computers, copiers, printers and fax machines at the switch. Avoid stand-by or sleep mode.
