	University of Pretoria	Research	Floristic sampling of the Kgalagadi Transfrontier Park, Botswana
	Confidential	Development	Biodiversity assessment of selected sites in the Okavango Delta for limited lodge development and hunting concessions
	African EPA	Development	Red Data investigation for development purposes
	Groundwater Consulting	Mining	Ecological investigation of Wildebeestpan
	Groundwater Consulting	Mining	Ecological investigation of Teufontein
	Groundwater Consulting	Mining	Ecological investigation of Aasvoelkrans
	Groundwater Consulting	Mining	Ecological investigation of Klipspruit
	Deneys Reitz Attorneys	Research	Quantification of fire damage to the vegetation structure in Sabi Sand Private Game Reserve
	Northam Platinum Limited	Mining	Development of an alien control programme for the mining area.
	SEF	Development	Removal and relocation of medicinal plants from Calswald development site.
	Woestalleen Collier	Mining	Development and installation of a natural wind and visual break between mining and provincial roads
	Confidential	Research	Vegetation structure analysis of waterpans in the Chobe National Park, Botswana
	Institute for Soil, Climate and Water	Research	Floristic sampling and development of a GIS remote sensing tool for the assessment of natural degradation of vegetation in the Gauteng Province
	Institute for Soil, Climate and Water	Research	Floristic sampling and development of a GIS remote sensing tool for the assessment of natural degradation of vegetation in the Mpumalanga Province

Key Qualifications & Attributes

Riaan A.J. Robbeson is an experienced ecologist and botanist, having obtained his Masters degree in Plant Ecology at the University of Pretoria while working as a research assistant on the National Grassland Biome Project. His involvement in specialist environmental studies followed naturally after graduation and he has since 1998 been involved in numerous projects that related to his field of expertise, ranging in size from a few hectares to provincial scale. Extensive experience has subsequently been obtained on the status and reaction of the natural environment to development and the assessment thereof. In addition to pure scientific investigations, he has also developed and successfully implemented several biodiversity monitoring programmes on mining areas. International projects include areas such as Botswana and Mozambique. Project management include the management of other specialist investigators and the ecological integration of biodiversity data and reports.

On a personal level, Riaan is an amateur wildlife photographer and is compiling a personal database of photographs of South African wild flowers. He also is a social ultra distance runner and has completed 4 Comrades marathons.

Education

DEGREE / DIPLOMA	FIELD	INSTITUTION
B.Sc.	Botany and Zoology (main subjects)	University of Pretoria (1987 – 1991)
B.Sc. (Hons)	Botany	University of Pretoria (1992)
M.Sc.	Plant Ecology	University of Pretoria (1994 – 1998)
Visual Basic Programming	Programming	Unischool (University of Pretoria), 1999

Post Graduate Study: M.Sc.

Community-level effects of fragmentation of the afromontane grassland in the escarpment region of Mpumalanga, South Africa

Supervisor: Prof. J.W.H. Ferguson
Co-Supervisor: Prof. A.S. Van Jaarsveld

ABSTRACT

Large scale afforestation, resulting in habitat destruction and fragmentation of the afromontane grassland in the Drakensberg escarpment of Mpumalanga, South Africa, has lead to the necessity of describing the flora and fauna aspects of the remaining grassland fragments, allowing forestry companies to mitigate the effects of afforestation on the biodiversity of these fragments and for initiating a management program for the remaining grassland. This study aims, firstly, to determine if any marked human-induced disturbance to the plant communities in the grassland fragments has occurred. I do this by comparing the plant communities of eighteen fragments with those of six control plots outside of the plantations with no marked disturbance to the grassland, by determining whether the plant assemblages in the fragments can be assigned to any of the natural and intact plant communities that Matthews (1993) described from a large-scale survey of undisturbed mountain areas and by ascertaining the presence of any known intruder plant species within the fragments. I also compare the faunal biodiversity in grassland fragments within afforested areas to that of control plots in undisturbed grassland and determine to which degree the Coleoptera, Orthoptera, Lepidoptera and bird communities reflect recognized plant communities, and are restricted to specific plant communities. Secondly, the study aims to compare the habitat specificity (degree of stenotopy) of the different taxonomic groups and trophic levels of animals and to make recommendations for the conservation of the

Afromontane grassland fauna in the remaining grassland fragments in afforested areas. Thirdly, I aim to quantify the effect of several environmental characteristics (slope, rainfall, geology, etc) on the faunal community structure of the grassland fragments, to quantify the effects of degree of isolation on species richness, species diversity and assemblage structure of plants, insects and birds in grassland remnants and to test for the effects of edges on the extant insect biodiversity in the grassland fragments inside plantations. Lastly, the study aims to quantify the effects of fragment size on species richness, species diversity and assemblage structure of plants, insects and birds and to rank the grassland fragments in an order of conservation importance using factors such as biodiversity and uniqueness of the floral community. The results indicate that afforestation and habitat fragmentation have not significantly impacted on the flora of the grassland fragments. Fragments are still identifiable as natural communities, described by previous workers during provincial-scale surveys. Also, no obvious invader – or disturbed plant communities are discernible even though some of the fragments have been isolated for as long as 40 years and the plant communities of conservation importance described by previous workers coincide with the important communities recognized in this study. Rare and endangered plant species, as well as species endemic to the region, are more frequently found on the scarce Black Reef quartzite of the region, which is more evident to the Northern part of the study area. Two plant communities are of particular conservation importance, not only as a result of their geological base, but also because of the high risk associated with the few grassland examples left of these communities. The high levels of habitat specificity of many of the taxonomic and trophic faunal groups indicate that many of the invertebrate taxa are probably endemic to the region, and that the plant endemicity encountered in the Afromontane grasslands is reflected by a similar degree of animal endemicity. The similarity in faunal assemblages and

diversity between isolated fragments and large areas of grassland emphasizes the conservation importance of the fragments, even when smaller than 5 Ha in extent. Fragments therefore have a high conservation importance, since they represent natural grassland areas and are sometimes the only representative of a particular plant community remaining in the area. I detected no significant edge effects on the faunal communities 10, 20 and 50 meters from the edge of the plantation. Birds (and probably other vertebrates in these grasslands) are affected by fragment size, while invertebrates are much less affected and plants do not show any measurable effect of fragment size. Fragments in the wetter northern part of the study area, characterized by high levels of plant endemicity, have a higher conservation importance as judged by faunal biodiversity. Experimental management involving grazing, mechanical cutting, grazing and burning is needed to derive an efficient management plan, so that the grassland biodiversity can be conserved in a planned way. Such work will also allow empirical testing of the efficiency of the indicator species suggested in this study.

Work experience as faunal Environmental Impact Assessment specialist for ECOCHECK

Summary: 153 projects in eleven provinces and three countries. Projects include linear structures such as roads, pipelines and power lines; as well as residential developments and various mines.

<u>YEAR</u>	<u>LOCATION</u>	<u>PROJECT</u>	<u>CLIENT</u>
2002	Gauteng, South Africa	Giel v/d Berg residential development	Die Giel v/d Berg Trust
2002	Mpumalanga, South Africa	Carlswald opencast coal mine	Tribal Consultants

JONATHAN JAMES SMALLIE

Curriculum Vitae

Date of birth: 20 October 1975

Qualifications: BSC – Agriculture (Hons)
University of Natal - Pietermaritzburg

Occupation: Field Biologist – Endangered Wildlife Trust –
Industries Partnership (a working group of
Endangered Wildlife Trust)

Duties: Conduct investigations, impact assessments, studies,
research on wildlife interactions with power line
infrastructure and wildlife hazards at airports.

The following projects have been completed since 2000.

1) Wildlife interactions with power lines

Bird Impact Assessment Studies for Electrical infrastructure:

Transmission lines:

- Mercury – Perseus 400kV
- Eros – Neptune – Grassridge 400kV
- Kudu-Juno 400kV
- Garona Aries 400kV
- Perseus Hydra 765kV
- Tabor – Witkop 275kV
- Tabor Spencer 400kV
- Moropule Orapa 220kV (Botswana)
- Coega Electrification
- Gamma Grassridge 765kV
- Gourikwa Proteus 400kVV

Distribution lines:

- Kanoneiland 22kV
- Hydra-Gamma 765kV
- Komani-Manzana 132kV
- Rockdale-Middelburg 132kV
- Irenedale 132 kV
- Zandfontein 132kV

- Venulu-Makonde 132 kV
- Spencer-Makonde 132 kV
- Dalkeith-Jackal Creek 132kV
- Glen Austin 88kV
- Bulgerivier 132kV
- Ottawa-Tongaat 132kV
- Disselfontein 132kV
- Voorspoed Mine 132kV
- Wonderfontein 132kV
- Kabokweni Hlau Hlau 132kV
- Hazyview Kiepersol 132kV
- Mayfern Delta 132kV
- VAAL Vresap 88kV
- Arthursview Modderkuil 88kV
- Orapa, AK6, Lethakane substations and 66kV lines (Botswana)
- Dagbreek Hermon 66kV
- Uitkoms Majuba 88kV
- Pilanesberg Spitskop 132kV
- Qumbu PG Bison 132kV
- Louis Trichardt Venetia 132kV
- Rockdale Middelburg Ferrochrome 132kV
- New Continental Cement 132kV
- Hillside 88kV
- Marathon Delta 132kV
- Malelane Boulder 132kV
- Nondela Strengthening 132kV
- Spitskop Northern Plats 132kV
- West Acres Mataffin 132kV
- Westgate Tarlton Kromdraai 132kV
-

Generation projects:

- Eskom Concentrated Solar Power Plant
- West Coast Wind Energy Facility
- Hopefield Wind Energy Facility

Substations:

- Nooitgedacht distribution
- Pilanesberg distribution
- Gamma Transmission

Risk Assessments on existing power lines:

- Hydra-Droerivier 1,2 & 3 – 400kV
- Hydra-Poseidon 1,2 – 400kV
- Butterworth – Ncora 66kV
- Nieu-Bethesda 22kV
- Maclear 22kV (Joelshoek Valley Project)
- Wodehouse 22kV (Dordrecht district)
- Burgersdorp - Aliwal North - Jamestown 22kV
- Cradock 22kV
- Colesberg area 22kV
- Loxton self build 11kV
- Kanoneiland 22kV
- Stutterheim Municipality 22kV
- Majuba-Venus 400kV
- Chivelston-Mersey 400kV
- Marathon-Prairie 275kV
- Delphi-Neptune 400kV
- Ingagane – Bloukrans 275kV
- Ingagane – Danskraal 275kV
- Danskraal – Bloukrans 275kV

Bird mortality investigations & other studies:

- Bird Impact Assessment for Lizard Point Golf Estate - Vaaldam
- Bird Impact Assessment for Lever Creek Estates housing development
- Investigation into rotating Bird Flapper saga – Aberdeen 22kV
- Investigation of in excess of 80 separate incidents of bird mortalities on power line networks from August 1999 to present
- Investigation of bird mortalities at 3 separate substations
- Special investigation into faulting on Ariadne-Eros 132kV
- Special investigation into Bald Ibis faulting on Tutuka Pegasus 275kV
- Special investigation into bird related faulting on 22kV Geluk Hendrina line
- Special investigation into bird related faulting on Camden Chivelston 400kV line

Avifaunal "walk thoughts" (EMP's):

- Beta Delphi 400kV
- Mercury Perseus 765kV
- Perseus 765kV Substation
- Beta Turn 765kV in lines

- Spencer Tabor 400kV line
- Kabokweni Hlau Hlau 132kV
- Mayfern Delta 132kV
-

Strategic Environmental Assessments for Master Electrification Plans

- Northern Johannesburg area
- Southern KZN and Northern Eastern Cape
- Northern Pretoria
- Western Cape Peninsula

Research projects:

- Southern Region Proactive GIS Blue Crane collision project

Conferences attended:

- September 2000: 5th World Conference on Birds of Prey in Seville, Spain.
- 2003: Presented a talk on "Birds & Power lines" at the 2003 AGM of the Amalgamated Municipal Electrical Unions – in Stutterheim - Eastern Cape
- June 2005: IASTED Conference at Benalmadena, Spain – presented a paper entitled "Impact of bird streamers on quality of supply on transmission lines: a case study"
- March 27 – 30 2006: International Conference on Overhead Lines, Design, Construction, Inspection & Maintenance, Fort Collins Colorado USA. Presented a paper entitled "Assessing the powerline network in the Kwa-Zulu Natal Province of South Africa from a vulture interaction perspective".

Courses & training:

- Successfully completed a 5 day course in High Voltage Regulations (modules 1 to 10) conducted by Eskom – Southern Region
- Successfully completed training on, and obtained authorization for, live line installation of Bird Flappers

Papers:

- Smallie, J. & Van Rooyen, C. 2003. Risk assessment of bird interaction on the Hydra-Droërivier 1 and 2 400kV. Unpublished report to Eskom Transmission Group. Endangered Wildlife Trust. Johannesburg. South Africa
- Van Rooyen, C. Jenkins, A. De Goede, J. & Smallie J. 2003. Environmentally acceptable ways to minimise the incidence of power outages associated with large raptor nests on Eskom pylons in the Karoo: Lessons learnt to date. Project number 9RE-00005 / R1127 Technology Services International. Johannesburg. South Africa
- Smallie, J. & Van Rooyen, C. 2005. Impact of bird streamers on quality of supply on transmission lines: a case study. Proceedings of the Fifth IASTED International Conference on Power and Energy Systems, Benalmadena, Spain.

2) Wildlife hazards at airports

Risk assessments:

Assessments of the bird strike hazard posed to aircraft have been conducted at the following airports:

- Kigali International Airport - Rwanda
- Port Elizabeth Airport – specialist study as part of the EIA for the proposed Madiba Bay Leisure Park
- Manzini International Airport (Swaziland)
- Polokwane International Airport
- Mafekeng International Airport
- Lanseria Airport

Courses and training:

- One day course in Airside Induction & Safety successfully attended

Conferences attended:

- May 2005: International Bird Strike Committee 27th meeting – Athens, Greece. Presented a paper entitled Bird Strike Data analysis at SA airports 1999 to 2004.

Papers:

- Smallie, J. & Froneman, A. 2005. Bird Strike data analysis at South African Airports 1999 to 2004. Proceedings of the 27th Conference of the International Bird Strike Committee, Athens Greece.

CURRICULUM VITAE (CV) FOR PROFESSIONAL STAFF OF WATER GEOSCIENCES CONSULTING

- 1. Position:** HYDROGEOLOGIST
- 2. Name of Firm:** Water Geosciences Consulting
- 3. Name of Expert:** Jude Cobbing
- 4. Date of Birth:** 29 October 1971
- 5. Nationality:** South African
- 6. Expertise:**
 - o Aquifer testing and groundwater sampling, quality assessment and evaluation
 - o Groundwater input to Environmental Impact Assessment and compliance
 - o Groundwater resource evaluation, including vulnerability assessments
 - o Down-hole borehole geophysical logging and log data interpretation
 - o Water borehole drilling and construction supervision
 - o Training of groundwater professionals
 - o Mine water assessment and remediation of mine-related water pollution

7. Education:

Name of institution	Degree(s) or Diploma(s) obtained:	Date of obtainment
University of London (University College)	MSc (Hydrogeology) Dissertation: The spatial variability of arsenic in groundwater at Magura, western Bangladesh	2000
University of South Africa (UNISA)	Post-Graduate Certificate in Education (PGCE) specialising in science and English teaching	1999
University of Cape Town	BSc (Geology)	1994

8. Membership of Professional Associations:

Professional Natural Scientist registered with the SA Council for Natural Scientific Professions (SACNASP Registration Number 400156/06)
 Member of the Geological Society of South Africa
 Fellow of the Geological Society of London and Chartered Geologist
 Member of the International Association of Hydrogeologists (IAH)
 Member of the Burdon Commission of the IAH, an African hydrogeology specialist group
 Member of the European Federation of Geologists

9. Other Training:

2006	One week course on Reactive Transport Groundwater Modelling, University of the Western Cape (co-organiser)
2006	One day course on the Department of Water Affairs and Forestry South African Groundwater Decision Tool (SAGDT)
2004	Three day course on ARCGIS 8 Geographical Information System software
2003	One week course in PRINCE2 Project Management Skills
2003	One week course on Quaternary geology and geomorphology
2003	Two day course in advanced WORD
2002	Two day course on geological core logging
2002	One day course on the use of portable down-hole geophysical logging equipment
2001 and 2002	Health and Safety courses including advanced driving, off-road driving and fire safety awareness

10. Countries of Work Experience: [List countries where expert has worked in the last ten years]

South Africa, Great Britain, N. Ireland, Malawi, Ghana, Nigeria, Bangladesh

11. Languages: [For each language indicate proficiency: good, fair, or poor in speaking, reading, and writing.]

Language	Reading	Speaking	Writing
English	Good	Good	Good
Afrikaans	Fair	Fair	Fair
Xhosa	Poor	Poor	Poor
French	Poor	Poor	Poor

12. Employment Record:

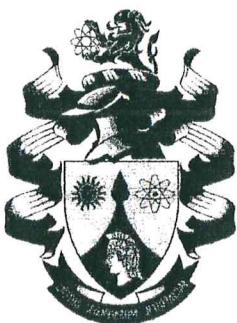

From [Year]: July 2007	TO [Year]: Present
Employer:	Water Geosciences Consulting
Positions held:	Hydrogeologist
Purpose of position:	Manage contracts and deliverables for various areas of interest to the company, including mining, environmental and state sectors.

From [Year]: July 2005	TO [Year]: June 2007
Employer:	Council for Scientific and Industrial Research (CSIR)
Positions held:	Hydrogeologist
Purpose of position:	To conduct research into groundwater and groundwater-related issues in South Africa, as part of the Water Resources Competence Area at the CSIR. The CSIR stressed high-quality research outputs in a multi-disciplinary environment, targeted in innovative ways at some of the most pressing water problems facing both South Africa and the greater SADC region.

From [Year]: November 2000	TO [Year]: May 2005
Employer:	British Geological Survey
Positions held:	Hydrogeologist (Higher Scientific Officer)
Purpose of position:	To conduct research into various aspects of hydrogeology and groundwater, both in the United Kingdom and elsewhere in the world, as part of the overall BGS research strategy. Projects ranged from two or three days to more than three years, and funding was sourced from both the public and the private (commercial) sectors. Part of my job was also to answer queries from members of the public regarding all matters related to groundwater.

From [Year]: May 1996	TO [Year]: August 1999
Employer:	Various
Positions held:	Construction worker, map-shop manager, school teacher
Purpose of position:	I worked in various positions in the United Kingdom whilst studying towards my PGCE qualification, and saving for the MSc qualification.

From [Year]: March 1995	TO [Year]: April 1996
Employer:	Lima Community Development Organisation
Positions held:	Water resources project manager
Purpose of position:	To manage the provision of community water supplies, including spring protection systems and boreholes, within the budget of this small non-governmental organisation (NGO). The work took place in the rural Eastern Cape Province, near the town of Mqanduli and the village of Zithulele.

Mr J.E. Cobbing Pr.Sci.Nat.
Suite 240
Private Bag X1
MENLO PARK
0102

Dear Mr Cobbing

PROFESSIONAL REGISTRATION IN TERMS OF SECTION 20(3)(a) OF THE NATURAL SCIENTIFIC PROFESSIONS ACT, 2003 (ACT 27 OF 2003)

It is our pleasure to confirm your registration as a *Professional Natural Scientist* in the field of practice *Earth Science* on 11 July 2006. Your registration number is 400156/06.

In terms of section 22(1)(a) and (b) of the Act you may use the title "Professional Natural Scientist" and affix the prescribed abbreviation "Pr.Sci.Nat." after your name.

A *registration card*, which lapses every year on 31 May, is issued to all registered persons in the category Professional Natural Scientist. Your card for the period ending 31 May 2007 is included.

The Council also issues a certificate of registration to each registered person for the category and field of practice in which he or she is registered. Your certificate will follow shortly.

In terms of section 24 of the Act the certificate remains the property of the Council and

- (a) *must be returned to the Registrar when a registered person voluntarily cancels his or her registration; or*
- (b) *within 30 days after directed to do so in writing, if a person's registration has lapsed after failing to pay the prescribed annual fee or portion thereof, within 60 days from it becoming due. [Section 21(1)(a)(iii).]*

With kind regards

Yours sincerely

A.J. DE KLERK
REGISTRAR
