Subject: PROPOSED AGGENUIS - PAULPUTS 400KV TRANSMISSION POWERLINE AND UPGRADE OF SUBSTATION (CORRIDORS), NC

Message Statutory Encroachment Application form.doc

Dear Ms Judy Fasheun

The above listed project bears reference.

The South African National Roads Agency SOC Limited (SANRAL) has received information regarding the above proposed projects relating to the establishment of a 400 KV transmission powerline and substation upgrade. The following comments should be noted:

- a. If abnormal loads have to be transported by road to the proposed site, a permit has to be obtained from the provincial government.
- b. SANRAL requires detail plans for approval of any alteration or upgrading measures that are required at any access - intersection with N14 National Road. The plans must be produced by an ECSA registered consulting engineer. All cost associated with road alteration or upgrading will be for the applicants account.
- c. Access information - Kilometre distance nearest to the access (see attached form, on which you can see the blue marker boards every 200m along the National Road). The status of the access – gravel or surfaced roads, with or without turning lanes.
- d. If services need to be constructed parallel within 60m measured from the road reserve fence, over or under the national road, (in this case the N14) the service owner must apply for a written permission from SANRAL, before any work may be carried out. Attached please find an application form for the proposed encroachment.
- e. Transport plan
- f. SANRAL must be consulted before the transport of abnormal loads commence on national roads. Please forward Transport Traffic Plan to Mr Garth Julius from this office at juliusg@nra.co.za

Do not hesitate to contact the sender should you have any further queries.

I trust that you will find the above in order.
