

**SUSTAINABLE
FUTURES ZA**

17 June 2014

Dear Stakeholder,

**PROPOSED DEVIATION OF THE EXISTING 132KV DASSENBERG-KOEBERG
POWER LINE FROM THE KOEBERG POWER STATION INTO THE
ANKERLIG POWER STATION**

NOTIFICATION OF A BASIC ASSESSMENT PROCESS

There is a dedicated supply from the Ankerlig Power station to the Koeberg Power Station in City of Cape Town Metropolitan Municipality, in the Western Cape Province. The National Nuclear Regulator (NNR) requires that this power line is not crossed by any of other power line so as to reduce any risks to the operation of this power line. Eskom therefore proposes to deviate a portion of the existing 132kV Dassenberg-Koeberg power line (approximately 15km) from the Ankerlig Power Station to the Koeberg Power Station, Western Cape Province. The portion of the power line that will not be used will be decommissioned.

The 132kV power line would be connected to a new 132kV HV yard adjacent to the now-to-be extended substation (high voltage (HV) yard) north of the Ankerlig Power Station.

ENVIRONMENTAL IMPACT ASSESSMENT PROCESS

In terms of the Environmental Impact Assessment (EIA) Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No. 107 of 1998), Eskom requires authorisation from the Department of Environmental Affairs (DEA) (in consultation with the Western Cape Department of Environmental Affairs and Development Planning) for the undertaking of the proposed project.

In order to obtain authorisation for this project, comprehensive, independent environmental studies must be undertaken in accordance with the EIA Regulations (GN543) and Listing Notices GN 544-546. An application for authorisation has been accepted by DEA for the proposed project under application reference number: **14/12/16/3/3/1/1182.**

Eskom has appointed **Savannah Environmental (Pty) Ltd**, as the independent environmental consultant, to undertake the required Scoping Phase and EIA to identify and assess all the potential environmental impacts associated with the proposed project, and propose appropriate mitigation and management measures in an Environmental Management Programme (EMP). As part of these environmental studies, I&APs will be actively involved through the public involvement process also being undertaken by Savannah Environmental.

Please find herewith the **Background Information Document (BID)** for the solar energy facility project. Please could you kindly confirm that you would like to be registered as and Interested and Affected Party (I&AP) on the project's database. Please could you kindly complete the attached Stakeholder Reply Form and send it to the undersigned via fax, post or email. By registering on the database, you will receive all information relating to the project and will be provided with an opportunity to provide comment and input into the EIA process.

Please could you submit your formal comments by sending written correspondence in this regard. All comments received will be submitted in the Scoping and EIA reports which will be submitted to the DEA. Comments can be made as written submission of fax, post or email.

Yours sincerely,

Shawn Johnston
Process Facilitator
(not signed via email/fax)

**SUSTAINABLE
FUTURES ZA**

12 March 2015

Dear Stakeholder

**PROPOSED DEVIATION OF THE EXISTING 132KV DASSENBERG-KOEBERG
POWER LINE FROM THE KOEBERG POWER STATION INTO THE
ANKERLIG POWER STATION, WESTERN CAPE PROVINCE**

**NOTICE OF AVAILABILITY OF DRAFT BASIC ASSESSMENT REPORT FOR
PUBLIC REVIEW**

There is a dedicated power supply from the Ankerlig Power Station to the Koeberg Power Station in City of Cape Town Metropolitan Municipality, in the Western Cape Province. The National Nuclear Regulator (NNR) requires that this power line is not crossed by any other power line so as to reduce any risks to the operation of this power line. **Eskom Holdings SOC Limited** (Eskom) therefore proposes to deviate a portion of the existing 132kV Dassenberg-Koeberg power line (approximately 15km) from the Ankerlig Power Station to the Koeberg Power Station, Western Cape Province. The portion of the power line that will not be used will be decommissioned.

The 132kV power line would be connected to a new 132kV high voltage (HV) yard adjacent to the now-to-be extended substation (HV yard) north of the Ankerlig Power Station. The following properties will be affected by the construction of the proposed power line:

- » Portion 2 of Farm Witzand
- » RE1 /2 of Farm Witzand
- » Portion 1 of Farm Witzand
- » Portion 3 of Farm Melk Post
- » Portion 5 of Farm Melk Post
- » Brakke Fontein 32
- » Farm 33
- » Farm 1183
- » Farm 1531

ENVIRONMENTAL IMPACT ASSESSMENT PROCESS

In terms of the Environmental Impact Assessment (EIA) Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No. 107 of 1998), Eskom requires authorisation from the National Department of Environmental Affairs (DEA) (in consultation with the Western Cape Department of Environmental Affairs and Development Planning) for the undertaking of the proposed project. In order to obtain authorisation for this project, comprehensive, independent environmental studies must be undertaken in accordance with the EIA Regulations (GN543) and Listing Notices GN 544-546 (as amended). An application for authorisation has been accepted by DEA for the proposed project under application reference number: **14/12/16/3/3/1/1182**.

A Draft Basic Assessment Report for the proposed deviation of 132kV Dassenberg-Koeberg power line has been prepared by Savannah Environmental and is available for public review. The review period is from **13 March – 16 April 2015**. Please could you kindly submit your formal comments by sending written correspondence in this regard. You are invited to review the report at one of the following locations:

- » Koeberg Public Library (Merchant Walk, Duynfontein, Melkbosstrand, 7441)
- » Wesfleur Public Library (Wesfleur Circle, Atlantis, 7349)
- » Koeberg Visitor Centre
- » www.savannahSA.com

CD copies are available on request

Please submit written comment on or before **16 April 2015**. All comments received will be included within the Final Basic Assessment Report which will be submitted to the DEA. Comments can be made as written submission via fax, post or e-mail.

Our team welcomes your participation and looks forward to your involvement throughout this process.

Kind Regards

Shawn Johnston

Process Specialist
