## Appendix 1

**Background about Medupi Integration and its relationship to Ngwedi (Mogwase) Project**  
 Attendees all agree not to do the presentation as they attend the focus group meeting on the 01 July 2010 and it is the same presentation

No	Issue	Raised By	Response
	<ul style="list-style-type: none"> <li>• He complements Margen Industrial Services that all the comments and issues that were raised at the meeting of 01 July 2010 were reflected correctly in the draft minutes.</li> <li>• The attendees in total agreed that the best corridor will be corridor one; it will have the less impact on the environment and the agricultural activities.</li> <li>• All attendees pointed out that the economic in pack of corridor 2 is more or less the same as in corridor one but the distance is longer and that will increase the cost to Eskom.</li> <li>• Corridor 3 is not recommended at all, it run next to the river and the pylons will be in the floodplain, can be in danger when there is big rainstorms. This happen at least once a year.</li> <li>• Small farms( Irrigation Farms &amp; exotic farms ) will not be economic fable to farm on if corridor three will be considered</li> <li>• Substations L+ M sites are very close to the river and there is proposed mining activity in the area including several lodges close to the sites. The area was under water in 2002 with the floods, the cost to secure the site will be very high and they will recommend that Eskom must look at substation site E or C.</li> </ul>	<p>Mr. N Teessen Seconsrivier Farmers Association</p> <p>All Attendees</p>	<ul style="list-style-type: none"> <li>• Comment noted: Mr Le Roux thank him for the complement</li> <li>• The recommendations are noted and will be forwarded to the EIA phase of the project.</li> </ul>
