

**ANDERSON-DINALEDI 400kV POWERLINE PROJECT AND ANDERSON 400kV SUBSTATION**

**Minutes of the 1<sup>st</sup> Public Meeting**

**DATE:** 8 October 2009  
**TIME:** 14:00-15:30  
**VENUE:** Nuclear Energy Corporation South Africa (NECSA)  
 Building V-03 room 517 (NECSA SHEQ building)  
**CHAIRPERSON:** Sonja van Eden

**1. Attendance**

<b>Parties Involved</b>		
<b>Environmental Consultant</b>		
Sonja van Eden	Nemai Consulting	Tel: 011 781 1730
<b>Proponent</b>		
Mpumelelo Ntombela	Eskom Grid Planning	Tel: 011 800 3255
Jamila Gwafila	Eskom Grid Planning	Tel: 011 800 3255
Annah Mosima	Eskom Transmissions	Tel: 011 800 3255
<b>NECSA</b>		
Jan v R v Oudtshoorn	NECSA: Manager: Utilities Services	Tel: 012 305 6410
Dr Cairns Bain	NECSA: Environmental Specialist	Tel: 012 305 3365
Hennie Martens	NECSA: Electrical Utilities and	Tel: 012 305 6410
Thomas Nkwane	NECSA: Electrical Engineering	Tel: 012 305 6410
Isabel Steyn	NECSA	Tel: 012 305 6410
Piers Pirow	NECSA: SHEQD	Tel: 012 305 6410

**2. Apologies**

None

### 3. Agenda Items and Discussions

No.	Item	Action
<b>1</b>	<b>WELCOME AND INTRODUCTION</b>	
1.1	SvE and AM welcomed all present to the meeting and thanked everyone of availing themselves to attend the meeting. The purpose of the meeting was to inform NECSA of the proposed Anderson-Dinaledi 400kV Powerline and Anderson 400kV Substation and to establish whether the construction of the new Anderson Substation will be allowed within the NECSA property.	
<b>2</b>	<b>PROJECT BACKGROUND</b>	
2.1	Eskom formally presented the proposed project to NECSA and indicated how the proposed was considered and why de-commissioned Anderson Substation Site was favourable for the construction of the new Anderson Substation.	
<b>3</b>	<b>Discussions</b>	
3.1	<p>During the meeting which was held with NECSA, they have indicated that the de-commissioned Anderson Substation is located within the NECSA security area and that Eskom will have difficulty to access the site during construction and maintenance, as security at NECSA are becoming very strict. Also indicated that NECSA are planning the expansion of their works, and will be utilising the Anderson site for expansion purposes. During the meeting NECSA indicated that they would prefer that Eskom rather construct the proposed substation to the south of the existing Anderson site. NECSA also requested a map of the proposed route and substation and a project description which should be forwarded to their CEO.</p> <p>During the meeting Eskom provided NECSA with the requested maps, and Nemai forwarded the project description and details to NECSA on the 12th of October 2009.</p> <p><i>On the 9th of October NECSA contacted Nemai and requested that the Public Participation Phase for this project be delayed as their CEO should first be notified of the proposed projects. During this telephonic conversation, NECSA also indicated that they had an internal meeting after the meeting with Nemai and Eskom, and that they have established that there is a possibility that the site which they have proposed for substation construction which is located to the south of the Anderson site, may not be suitable for substation construction, due to the NECSA future planning and expansions.</i></p>	
<b>3</b>	<b>Closing</b>	

	All comment made by NECSA was noted and the meeting was closed. All parties were thanked for attending the meeting.
