NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT PROCESS PROPOSED STEELPOORT INTEGRATION PROJECT, LIMPOPO PROVINCE

Eskom Holdings Limited is planning a new Pumped Storage Scheme approximately 40 km north-west of Simplon Substation in the Mpumalanga Province. This Pumped Storage Scheme (to be known as the Steelpoort Pumped Storage Scheme) is scheduled to be in operation by 2014. In order to integrate this Pumped Storage Scheme into the electricity transmission network, Eskom Transmission is proposing the construction of the following:

- 1. A 400 kV substation at a site in close proximity to the Steelpoort Pumped Storage Scheme
- 2. 2 x 400 kV loop in and out the Duvha-Leseding 400 kV line into Steelpoort substation, a distance of approximately 40 km
- 3. Construction of a 400 kV powerline between Steelpoort and Merensky substations, a distance of approximately 50 km
- Associated works to integrate the station into the Transmission grid

Feasible substation and Transmission line Alternatives will be identified for investigation within a broader study area.

In terms of sections 24 and 24D of the National Environmental Management Act (No. 107 of 1998), as read with Government Notices R385 (Regulations 27–36) and R387, a Scoping and Environmental Impact Assessment (EIA) are required to be undertaken for this proposed project. This project has been registered with the National Department of Environmental Affairs and Tourism (DEAT), the Competent Authority for this proposed project, under Application Reference Number 12/12/20/866.

In this regard, Savannah Environmental has been appointed as an independent consultant to undertake the required EIA, and Afrosearch has been appointed to undertake the required public participation process for the proposed project.
