**KENNISGEWING VAN BASIESE OMGEWINGSEVALUERINGSPROSES
VOORGESTELDE WATERRESERVOIR EN GEPAARDGAANDE
WATERPYPLYNE BY MEDUPI KRAGTASIE, LIMPOPOPROVINSIE**

'N ESKOM-INISIATIEF

Ten einde die Medupi Kragtasiekompleks (naby Lephalale in die Limpopoprovinsie) te optimaliseer, stel Eskom Holdings Beperk die verskuiving van die beplande waterreservoir van die kragtasiekompleks na die plaas Kuipersbult voor. Aansoek vir magtiging word vir die volgende verlang:

- » Die oprigting van 'n waterreservoir met 'n kapasiteit van 400 000 m³ op die plaas Kuipersbult (wat 'n oppervlak van ~6,9 ha sal beslaan).
- » Die oprigting en bedryf van 'n pyplyn (ondergrond) vanaf die bestaande DWAF waterpyplyn (waterbron) tot by die reservoir (ongeveer 10 km lank), wat 'n in-lyn klephuis insluit.
- » Die oprigting en bedryf van 'n pyplyn vanaf die reservoir tot by die kragtasie (ongeveer 5 km lank).

Ingevolge artikel 24 en artikel 24D van die Nasionale Wet op Omgewingsbestuur (No 107 van 1998), saamgelees met Staatskennisgewings R385 (Regulasies 22-26) en R386, word verlang dat 'n Basiese Evalueeringsproses onderneem word vir die oprigting van aanlegte of infrastruktuur, insluitend gepaardgaande strukture of infrastruktuur vir:

Item I(n): die buitestroom berging van water, insluitend damme en reservoirs, met 'n kapasiteit van 50 000 m³ of meer

Item I(k): die grootmaat vervoer van water in pyplyne met (i) 'n interne deursnee van 0,36 meter of meer; of (ii) 'n piek deurvloei van 120 liter per sekonde of meer

Item I(p): die tydelike berging van gevaarhoudende afval.

In hierdie verband is Savannah Environmental aangestel as 'n onafhanklike evalueeringspraktisyn om die verlangde omgewingsproses en openbare deelnameproses vir die voorgestelde projek te onderneem. Ten einde verdere inligting te bekom en op die projek se databasis te registreer, verstrekk assesseblief u naam, kontakbesonderhede en belang in die projek aan:
