**NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT: PROPOSED CONSTRUCTION OF
THE NEW 66/11KV MOORREESBURG-VYVLEI POWERLINE AND SUBSTATION –
SWARTLAND MUNICIPALITY, CAPE TOWN**

Notice is given in terms of the Environmental Impact Assessment Regulations promulgated in terms of section 24(5) of the National Environmental Management Act, 1998 (Act no. 107 of 1998), as amended, of intent to carry out the following activity:

Malmesbury Farmers (F) 1 peaked in July 2008 with 2.361MVA. The calculated feeder growth is 3.1% per annum. Malmesbury F1 is experiencing voltage problems with voltages on some parts of the feeder being below the 95% limit. Several new power applications have been received on Malmesbury F1. However, there is no more spare capacity on Malmesbury F1 to accommodate these loads due to voltage constraints.

Eskom therefore, proposes to acquire a servitude and build a 66kV powerline (approximately 30km) from Moorreesburg substation towards Vyevelei substation; create a 66kV feeder bay at Moorreesburg substation to cater for the Vyevelei substation; build a Vyevelei 1x10MVA 66/11kV step-down substation consisting of 1x66kV feeder bay and 2x11kV feeder bays (Vyevelei F1 and F2). It further proposes to leave spatial requirements for a second 10MVA 66/11kV transformer bay and 1x11kV feeder bay. Eskom has been granted an exemption from using an independent Environmental consultant by the Department of Environmental Affairs (DEA), reference number: 12/12/20/1825.

The Draft Basic Assessment Report as well as the Environmental Management Programme will be available for your perusal at the Moorreesburg Public Library, Church Street, Moorreesburg and Malmesbury Public Library, Voortrekker Road, Malmesbury on 16 July 2010.

.If you wish to be included on the database of interested and affected parties, raise concerns, or make suggestions about the proposed development please forward your name and/or comments no later than **23 August 2010** to:

KENNISGEWING VAN OMGEWINGSIMPAK STUDIE: VOORGESTELDE KONSTRUKSIE VAN 'N NUWE 66KV/11KV MOORREESBURG-VYEVLEI KRAGLYN EN SUBSTASIE –SWARTLAND MUNISIPALITEIT, KAAPSTAD

"n Kennisgewing is uitgereik ten opsigte van die Omgewings waarnemings Impak studie Regulasies in terme van seksie 24(5) van die Nasionale Omgewingsbestuur Wet, 1998 (Wet nr. 107 van 1998), soos aangepas, by voorneme om die volgende aktiwiteit uit te voer:

Malmesbury Boere 1 het in Julie 2008 gespits met 2.361 MVA. Die berekende voerder groei is 3.1% jaarliks. Malmesbury Boere 1 ondervind spannings probleme met spannings op gedeeltes van die voerders onder die 95% limiet. Verskeie nuwe krag aansoeke is ontvang op Malmesbury Boere 1. Daar is nie meer spaar kapasiteit op Malmesbury Boere 1 om hierdie vraag te akkomdeer nie ten opsigte van die spannings te korte.

Daarom stel Eskom voor om 'n servituut te verkry en die bou van 'n 66kV kraglyn (ongeveer 30 km) vanaf Moorreesburg substasie na Vyevelei substasie; 'n 66kV voerder bank te skep by Moorreesburg substasie om te voldoen aan die Vyevelei substasie; die bou van Vyevelei 1 x 10 MVA 66/11kV verlagings substasie wat 1 x 66kV voerder bank en 2 x 11kV voerder banke (Vyevelei Boere 1 and Boere 2) bevat. Daar word verder voorgestel om ruimtelik voorwaardes te los vir 'n tweede 10MVA 66/11kV transformator bank en 1 x 11kV voerder bank. Eskom het vrywaring ontvang vir die gebruik van 'n onafhanklike omgewings konsultant van die Departement van Omgewingsake en Toerisme(DEAT), verwysingsnommer: 12/12/20/1825.

'n Tydelike Basiese Waarnemings Verslag sowel as die Omgewings bestuursprogram sal beskikbaar gestel word vir u noukeurige deurlusing by die Moorreesburg Publieke Biblioteek, Church Straat, Moorreesburg en Malmesbury Publieke Biblioteek, Voortrekker Weg, Malmesbury op 16 Julie 2010.

Indien u op die databasis vir geïntereerde en geïmpakteerde partye ingesluit wil word, bekommernisse te lig en voorstelle te maak in verband met die voorgestelde ontwikkeling stuur asseblief jou naam en kommentaar nie later as 23 Augustus 2010 na:

Samoa seëvier in nat weer

RUGBY - Moorreesburg (Samoa) het Saterdag sy wedstryd teen Newtons van Wellington gewen.

Dit was 'n harde wedstryd wat in ysigte reënweer op Samoa se tuisveld beëlis is.

Die A-span het 20-14 geseëvier. Hannas Morris het 2 drieë gedruk en Giovanni Toontjies 1. Morris het ook met 'n doelskop geslaag terwyl Marco September 'n strafdoel oortreklits het.

Moorreesburg B het sy wedstryd 19-5 gewen, met drieë, deur Jan Markus, Jethro Erasmus en Carlito Daniels. Llewellyn Faromalaag met 2 doelskoppe.

Die C-span het sy wedstryd met 30-0 gewen. Garith Maarman sorg vir 3 drieë en Abri Adonis vir een.

NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT: PROPOSED CONSTRUCTION OF THE NEW 66/11KV MOORREESBURG-VYEVLEI POWERLINE AND SUBSTATION SWARTLAND MUNICIPALITY, CAPE TOWN

Notice is given in terms of the Environmental Impact Assessment Regulations promulgated in terms of section 24(5) of the National Environmental Management Act, 1998 (Act no. 107 of 1998), as amended, of intent to carry out the following activity:

Malmesbury Farmers (F) 1 peaked in July 2008 with 2.361MVA. The calculated feeder growth is 3.1% per annum. Malmesbury F1 is experiencing voltage problems with voltages on some parts of the feeder being below the 95% limit. Several new power applications have been received on Malmesbury F1. However, there is no more spare capacity on Malmesbury F1 to accommodate these loads due to voltage constraints.

Eskom therefore, proposes to acquire a servitude and build a 66kV powerline (approximately 30km) from Moorreesburg substation towards Vyevelei substation; create a 66kV feeder bay at Moorreesburg substation to cater for the Vyevelei substation; build a Vyevelei 1x10MVA 66/11kV step-down substation consisting of 1x66kV feeder bay and 2x11kV feeder bays (Vyevelei F1 and F2). It further proposes to leave spatial requirements for a second 10MVA 66/11kV transformer bay and 1x11kV feeder bay. Eskom has been granted an exemption from using an independent Environmental consultant by the Department of Environmental Affairs (DEAT), reference number: 12/12/20/1825.

The Draft Basic Assessment Report as well as the Environmental Management Programme will be available for your perusal at the Moorreesburg Public Library, Church Street, Moorreesburg and Malmesbury Public Library, Voortrekker Road, Malmesbury on 16 July 2010.

If you wish to be included on the database of interested and affected parties, raise concerns, or make suggestions about the proposed development please forward your name and/or comments no later than 23 August 2010 to:

Eskom Holdings Limited Reg No 2002/015527/06

Mamre mors met Temperance

RUGBY - Mamre het Saterdag op sy tuisveld vir Temperance van Gouda 'n goeie rugbyles geleer. Die Swartlanders het die wedstryd voortliggend met 56 (5 doele, 3 drieë en 2 strafdoele) teenoor 5 (1 drie) gewen. Met die aanbreek van rustyd was die skrif reeds aan die muur vir die span van Gouda met die telling 33-0 in die guns van Mamre.

Na rustyd is die krane wyd oopgedraai en was dit eengrigtingverkeer. Die vyftiental van Ronald Sambamba

(senior administrateur) is die topspan in die kompetisie en 'n hoër liga wink vir die Swartlanders. Puntmakers: Devin van Niekerk (2), Myron Daniels (2), Gerald Arends (2), Garth Liedeman en Patrick Oppelt het vir Mamre agter die doelpale gaan kuler. Angelo Thompson slaag met 5 doelskoppe en 2 strafdoele. Temperance se drie is deur Innus Jones gedruk. Ander uitslae: Mamre B 56, Temperance B 0; Mamre C 34, Temperance C 0. -Bennie Abdol

RUGBY - Swartland Hoër het verlede week 'n geslaagde rugbytoernooi aangebied. Hier is die eerste span in ekste teen Hoër Landboueskool Oudkale van Riversdal. Die Swartlanders moes in die wedstryd die knie bulg met 36-3. Hier is Estevan Janse van Rensburg met die bal, terwyl Duncan Matthews nader kom om te help. Foto: Susan Botha

Flying Eagles vlieg hoog op Eendekuil

RUGBY - Eendekuil het Saterdag op hul tuisveld hul vierke uitgesprei en 'n oorwinning van 18 (2 drieë en 'n strafdoel) teenoor die 7 (1 doel) van Coronations van Kalbakraal behaal. Dit was 'n eerstateliga-wedstryd (Weskus). Puntmakers: Flying Eagles se drie-drukkers was

Ashwin Tietemani en Tiaan Muller. Die strafdoel is deur Randy Wewers oorgeskop. Coronations se drie is deur Jade Lee Geduld gedruk en hy het ook met die doelskop geslaag. -Bennie Abdol

raib

'n Toonaangewende vervaardiger en verspreider van hout-, aluminium en polystoer komponente geleë in Malmesbury, bied tans die bogenoemde vakante pos:

PERSOONLIKE ASSISTENT

Die ideale kandidaat is 'n angslekte, dinamiese en professionele persoon. Die kandidaat sal verantwoordelik wees vir die uitvoering van alle sekretariese pligte vir die Bestuurende Direkteur.

Minimale Requisites:

- Matiek
- Sekretariese Sertifikaat of Diploma
- Ten volle betroulik (Afrikaans en Engels)
- Uitstekende rekenaarvaardigheid (MS Office pakette: Word, Excel)
- Ten minste 2-3 jaar ondervinding as sekretariese
- Uitstekende kommunikasie en interpersoonlike vaardighede
- Goede beplanning en organisering-vermoë

Indien u een of meer van die vereistes voldoen stuur u CV aan 086 606 7000 of per e-pos: hr@raib.co.za

SA-Indagetyd: 19 Julie 2010

(Indien u binne 30 dae geen terugvoering ontvang het nie, kan u u aansoek as onuitgelees beskou)

AUCTION ALLIANCE

Ruim woning in doodloopstraat

- TV-kamer met kaggel • Afsonderlike 2-slaapkamer, 2-berokamerwoonstel
- Ontspanningsopvoertuie vir 'n verdere woonstel
- OORSTROMINGSSTANDERT met elektriese hekke en outomatiese dubbelgarage
- 3 slaapkamers

Te koop met of sonder meubels

Besigtig: Sa 31:07, 11u-12u

KENNISGEWING VAN OMGEWINGSIMPAKSTUDIE: VOORGESTELDE KONSTRUKSIE VAN 'N NUWE 66KV/11KV MOORREESBURG-VYEVLEI KRAGLYN EN SUBSTASIE SWARTLAND MUNISIPALITEIT, KAAPSTAD

'n Kennisgewing is uitgereik ten opsigte van die Omgewings waarnemings Impak studie Regulasies in terme van seksie 24(5) van die Nasionale Omgewingsbestuur Wet, 1998 (Wet nr. 107 van 1998), soos aangepas, by voorneme om die volgende aktiwiteit uit te voer:

Malmesbury Boere 1 het in Julie 2008 gespits met 2.361 MVA. Die berekende voerder groei is 3,1% jaarliks. Malmesbury Boere 1 ondervind spannings probleme met spannings op gedeeltes van die voerders onder die 95% limiet. Verskeie nuwe krag aansoek is ontvang op Malmesbury Boere 1. Daar is nie meer spaar kapasiteit op Malmesbury Boere 1 om hierdie vraag te akkomodeer nie ten opsigte van die spannings te kort.

Daarom stel Eskom voor om 'n servituut te verkry en die bou van 'n 66kV kraglyin (ongeveer 30 km) vanaf Moorsburg substasie na Vyevlei substasie; 'n 66kV voerder bank te skep by Moorsburg substasie om te voldoen aan die Vyevlei substasie; die bou van Vyevlei 1 x 10 MVA 66/11kV verligings substasie wat 1 x 66kV voerder bank en 2 x 11kV voerder bank (Vyevlei Boere 1 and Boere 2) bevat. Daar word verder voorgestel om ruimtelik voorwaardes te los vir 'n tweede 10MVA 66/11kV transformator bank en 1 x 11kV voerder bank. Eskom het vrywaring ontvang vir die gebruik van 'n onafhanklike omgewingskonsultant van die Departement van Omgewingsake en Toerisme(DEAT), verwysingsnommer: 12/12/20/1825.

'n Tydelike Basiese Waarnemingsverslag sowel as die Omgewingsbestuursprogram sal beskikbaar gestel word vir u noukeurige deurlusing by die Moorsburg Publieke Biblioteek, Church Straat, Moorsburg en Malmesbury Publieke Biblioteek, Voortrekker Weg, Malmesbury op 16 Julie 2010.

Indien u op die databasis vir geïnteresseerde en geaffekteerde partye ingesluit wil word, bemarkemise te lig en voorstelle te maak in verband met die voorgestelde ontwikkeling stuur asseblief jou naam en kommentaar nie later as 25 Augustus 2010 na:

PPC, South Africa's leading cement manufacturer, and 2nd Best Company to work for in South Africa, offers you a stimulating opportunity for career preparation at the De Hoek Factory, in the pleasantly rural atmosphere of Piketberg (130km from Cape Town)

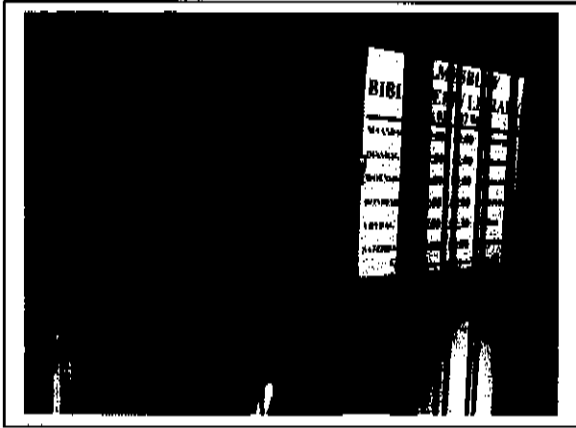

If you already completed your N3 certificate with the necessary subjects as required for the above trade we would like to hear from you.

An ability to perform in a production environment (heavy industry), a technical aptitude and good interpersonal skills will be a strong recommendation.

If you meet our requirements, please submit a CV, with your application, to Lorraine Lourens, PPC De Hoek, P.O. Box 10311, De Hoek, 7321 or fax (022) 913 1859.

Closing date: 30 July 2010

Dear Madam

DRAFT BASIC ASSESSMENT REPORT (BAR) AND ENVIRONMENTAL MANAGEMENT PLAN (EMP) FOR THE PROPOSED 66/11kV MOORRESBURG-VYEVLEI POWERLINE AND SUBSTATION.

Your correspondence regarding the above-mentioned application dated 11 July 2010 with DEA&DP ref no. 12/12/20/1825 refers:

A letter from the Local Municipality confirming the availability of the capacity to accommodate the solid waste must be obtained prior the proposed development may commence.

The following conditions are adhered to all the times.

- All the procedures to minimise the potential impact as stipulated in the EMP must be adhered to all the times.
- A qualified specialist must be appointed to oversee the development during the construction and operation phase of the substation as indicated in the report.
- Any water use activity that is not Schedule 1 water use must be registered and authorised with this Department in terms of Section 21 of the National Water Act 1998 (Act No. 36 of 1998).
- Please note that, if the earth cables will cross rivers or streams, Authorisation must be obtained from this Department before such activity may commence.
- Any development that may take place within a 500m from any wetland, also Authorisation must be obtained from this Department.
- Stormwater management plan must be put in place. The clean stormwater system must be separated from dirty stormwater system.
- Chemical toilets that will be utilised during construction phase must be properly located such that they do not pose risk of water resource pollution and its contents must be disposed of at an authorised facility.
- Fuel and oil storage area must be hardened and bunded in order to minimise pollution of the environment.
- No surface, ground or storm water may be polluted as a result of any activities.
- Solid waste must be managed in accordance with the requirements of the relevant legislation.
- All the requirements of the National Water Act (NWA), 1998 (Act No. 36 of 1998) must be adhered to at all times.

You are welcome to contact this office should you have any further questions in this regard.

Yours faithfully

Dear Ms. Hlongwana

RE: Proposed 66/11kV Moorreesburg – Vyevlei powerline and substation – Draft Basic Assessment Report.

DEA Ref: 12/12/20/1825

CapeNature would like to thank you for the opportunity to comment on this proposed activity and wish to make the following comments:

1. The preferred route alternative lies across land that was historically covered by Swartland Shale Renosterveld and Swartland Granite Renosterveld. Both of these vegetation types are now considered to be Critically Endangered.
2. However, it appears that the preferred route and preferred site for the new substation have been almost entirely transformed by agricultural activities.
3. Both route alternatives cross and pass near several rivers and streams and therefore construction activities must be strictly controlled in these areas so that no part of the rivers, riparian areas or wetlands are impacted by the powerlines.
4. Bird diverters must be placed on the lines (no matter which route alternative is selected) but the preferred route alternative is likely to have less impact on avifauna.
5. The landowners of properties which will be affected must be asked to point out any ecologically sensitive areas or areas of natural vegetation remaining on their land which must be clearly demarcated as no-go areas during construction.

CapeNature reserves the right to revise initial comments and request further information based on any additional information that may be received.

The Western Cape Nature Conservation Board trades as **CapeNature**

Board Members: Prof Aubrey Redlinghuis (Chairperson), Dr Colln Johnson (Vice Chairperson), Mr David Frandsen, Dr Edmund February, Mr Elton Jethas, Ms Francina du Bruyn, Mr Hoosain Kagee, Mr Johan van der Merwe, Adv. Mandla Mludlu, Mr Mark Botha, Ms Nomtha Dilima, Prof Sulalman Gool

Yours sincerely

ENVIRONMENTAL ASSESSMENT PROCESS:

CONSTRUCTION OF VYEVLEI SUBSTATION & OVERHEAD POWER LINE

PORTION 3 OF THE FARM DIE PONT NO 243: DIVISION PIKETBERG:

BERGRIVIER MUNICIPALITY.

Your application was referred to Mr Duma Cumbi of our Department. Rather address applications in future to the Land Use Manager when applications are referred to the Department's provincial office for comment. As a result of this, the information was only referred to this office on the 23rd of July. Also note that the contact details of Mr Smit of our Moorreesburg office was also misspelled, thereby not receiving your e-mail. Nevertheless the Draft Basic Assessment Report has reference.

The Western Cape Department of Agriculture wishes to thank you for the opportunity to comment on the above.

In principle this office supports the upgrading and expansion of electricity provision network and amenities, because agricultural production and processing has become dependent on a sustainable electricity supply. The role of commenting is therefore regarded as a platform to raise concerns in order to propose alternatives and mitigation measures.

Power Line

As a point of departure, it is assumed that the placing of masts and anchors will take the existing infrastructure and natural limitations in consideration. It is therefore assumed that masts and anchors would be placed

- Outside the calculated flood lines of rivers and streams.
- Outside roads, access roads and offset far enough from gates in order to allow access and movement of farming implements and not only vehicles.
- Outside contour banks in order not to obstruct storm water runoff within protection works (contour banks) and cause erosion.

It is further more advised that construction would be communicated with the land users and owners. Construction must rather be conducted in the offseason. Product and personal security must be guaranteed.

The two alternative routes have negative impacts on agricultural land use: Aerial spraying of herbicides and pesticides will be impacted on in both cases. Long straight lines that follow the existing fields rather than the cadastral boundaries may prove to be the best situation. It is therefore advised that the local farmers must comment on the alternatives and that proposals be amended according to land use rather than cadastral lines.

It is noted that letters objecting to the proposed routes were received from the respective landowners. The size and direct impacts of the infrastructure is not known to the land owners and there is a concern that the public participation process is not followed correctly.

Please incorporate the suggestions of farmers in the proposed alternatives.

In the cases of Farm 589 the proposed route does not follow the land use and cadastral boundaries. In this case the proposed power line will cross through a cultivated field.

The route along the existing power line might however sterilize a larger area due to the cumulative effect of parallel lines placed in buffer distances and according to regulations from each other.

Substation

- The size of the maps is too small to actually determine the direct impact of the proposed substation on agricultural land. Please provide maps on aerial photography background on a comfortable and workable scale and include the contour lines on these maps. It is impossible to judge at this stage which of the two sites is preferred from an agricultural perspective. With receipt of the land owners comments, larger scale maps and specific land use description it would probably be easier to comment.
- It is further more advised that construction would be communicated with the land users and owners. Construction must rather be conducted in the offseason. Product and personal security must be guaranteed. Contamination of the perennial crops due to dust pollution must be avoided at all times.

Please Note:

- The Western Cape Department of Agriculture reserves the right to request further information and revise initial comments based on any additional information that might be received.
- Please use this reference number in any future communication.

Yours sincerely

Dear Sir

**COMMENTS ON THE DRAFT BASIC ASSESSMENT REPORT ("DBAR") FOR THE PROPOSED 64/11KV
POWERLINE AND SUBSTATION BETWEEN MOORREESBURG AND VYEVLEI. (DEA REF NO: 12/12/20/1625)**

The abovementioned document dated July 2010 and received by the Department on 19 July 2010, refers.

1. Please find below this Department's provisional comments:

1.1. The proposed activity will occur on agricultural land that has been transformed mostly by wheat farming. This Department has no objection to the proposed development on condition that all mitigation measures as described in the Environmental Management Programme are implemented and that the Department of Agriculture has no objection to the proposed activity.

1.2. In addition, the following mitigation measures must be implemented:

- water must not be used to suppress dust nuisance as water resources are severely pressured in the Western Cape;
- the removal of sensitive indigenous vegetation must be limited and power lines must be located where possible, on already disturbed land; and
- any cement or concrete mixing must be done on an impervious surface to prevent soil contamination

This Department reserves the right to revise or withdraw any comments or request further information from you based on any information that might be received.

Yours faithfully

Dear Sirs

RE: NOTICE: EXEMPTION FROM APPOINTING AN INDEPENDANT ENVIRONMENTAL ASSESSMENT PRACTITIONER (EAP) FOR THE PROPOSED 66/11KV MOORREESBURG – VYEVLEI POWERLINE AND SUBSTATION – CAPE TOWN. DEA's reference : 12/12/20/1825

Your letter dated 3 June 2010, sent to Mr L Louw, refers.

We have instructions not to appeal against the decision of Environmental Affairs to exempt you from appointing an independent EAP for the proposed 66/11kV, Moorreesburg - Vyevlei powerline and substation with reference DEA 12/12/20/1825.

We do however have instructions to object to the proposed line's route and the alternative route B on the basis that it is not following a current degraded area along the road, as mentioned in the exemption letter from Environmental Affairs dated 26 May 2010.

Client wants the insurance that he will be granted an opportunity to make further suggestions and inputs as to alternate routes, which will have less environmental and economic impact on his farming activities and will only affect the owner of Vyevlei Farm, who seems to be the sole beneficiary of the requested Vyevlei powerline and substation.

We look forward to receiving your confirmation that client will be allowed the opportunity to make inputs as to an alternative route of the powerlines, supplying the Vyevlei substation.

Yours faithfully
LIONEL FRANK & SON

Proposed construction of the Moorreesbug - Vyevelei Power Line and Substation, Western Cape

Project ID no's 3480C & 3480A

One of our conservancy members, Mr Lammie Louw of the farm Tweekuyl in the Malmesbury district has asked me to contact you regarding the above matter. Proposed powerlines are planned to go over his land.

Mr Nelius Louw of the farm Rondsriek has not received notice concerning the above proposed powerlines even though the proposed siteB for a substation is planned for his farm.

Can we receive more information as to exactly how big these substations and powerlines are going to be – show us examples of similar substations and powerlines.

Another big query from our members is how much arable land is going to be lost to the farmers due to powerlines going over farmland. Existing powerlines over farmland make it already very difficult cultivating the land.

Is it possible for landowners to suggest alternative routes for the proposed powerlines?

From the conservancy point of view it is worrying that Eskom is exempt from appointing an independent Environmental Assessment Practitioner as required by the the National Environmental Management Act where such powerlines are planned to go over farms who have joined a conservancy.

The other worrying fact is that these powerlines are planned at a huge financial cost to Eskom for the pure reason that the dairy at Vyevelei (the biggest dairy in the western cape) requires more electricity when the technology exists for Eskom to use the dairy to generate power for the dairy and enough additional electricity to service the whole of Malmesbury if not more. This dairy is the ideal site for Eskom to generate green and renewable energy.

We were given 4 days to contact Mrs. Nokhuthala Hlongwana at Eskom Holdings Limited about this project but she is out of office till further notice.

Please contact me as soon as possible so that we can clear up any questions concerning this project.

Dear Madam

NOTICE: EXEMPTION FROM APPOINTING AN INDEPENDENT ENVIRONMENTAL ASSESSMENT PRACTITIONER (EAP) FOR THE PROPOSED 66/11kV MOORREESBURG - VYEVLEI POWERLINE AND SUBSTATION- CAPE TOWN. DEA's reference: 12/12/20/1825

Eskom wishes to inform you that the exemption from appointing an independent EAP in terms of the Environmental Impact Assessment (EIA) Regulations of 21 April 2006 under the National Environmental Management Act (No. 107 of 1998), as amended, for the afore-mentioned project was granted by the Department of Environmental Affairs (DEA) on 26 May 2010.

In terms of regulation 10(2) of the EIA Regulations, 2006, the holder of the exemption (Eskom Holdings Limited) must notify every registered interested and affected party (I&AP), in writing within 10 calendar days, of receiving notice of the Department's decision to grant the exemption as well as the provisions regarding the making of appeals that are provided for in the regulations.

The notice outlines the conditions of exemption, key factors affecting the decision, recommendations and the appeal process. A copy of Annexure 1: Reasons for the Decision for the Environmental Exemption (EA) and a locality plan for the proposed project have been attached for your perusal and reference.

Should you wish to appeal aspects of the exemption, be advised that the notice of intention to appeal must be made to the Minister of Environmental Affairs, within 10 days of receiving this exemption notice from appointing an independent EAP.

Dear Sir

NOTICE: EXEMPTION FROM APPOINTING AN INDEPENDENT ENVIRONMENTAL ASSESSMENT PRACTITIONER (EAP) FOR THE PROPOSED 66/11kV MOORREESBURG - VYEVLEI POWERLINE AND SUBSTATION- CAPE TOWN. DEA's reference: 12/12/20/1825

Eskom wishes to inform you that the exemption from appointing an independent EAP in terms of the Environmental Impact Assessment (EIA) Regulations of 21 April 2006 under the National Environmental Management Act (No. 107 of 1998), as amended, for the afore-mentioned project was granted by the Department of Environmental Affairs (DEA) on 26 May 2010.

In terms of regulation 10(2) of the EIA Regulations, 2006, the holder of the exemption (Eskom Holdings Limited) must notify every registered interested and affected party (I&AP), in writing within 10 calendar days, of receiving notice of the Department's decision to grant the exemption as well as the provisions regarding the making of appeals that are provided for in the regulations.

The notice outlines the conditions of exemption, key factors affecting the decision, recommendations and the appeal process. A copy of Annexure 1: Reasons for the Decision for the Environmental Exemption (EA) and a locality plan for the proposed project have been attached for your perusal and reference.

Should you wish to appeal aspects of the exemption, be advised that the notice of intention to appeal must be made to the Minister of Environmental Affairs, within 10 days of receiving this exemption notice from appointing an independent EAP.

Dear Sir

NOTICE: EXEMPTION FROM APPOINTING AN INDEPENDENT ENVIRONMENTAL ASSESSMENT PRACTITIONER (EAP) FOR THE PROPOSED 66/11kV MOORREESBURG - VYEVLEI POWERLINE AND SUBSTATION- CAPE TOWN. DEA's reference: 12/12/20/1825

Eskom wishes to inform you that the exemption from appointing an independent EAP in terms of the Environmental Impact Assessment (EIA) Regulations of 21 April 2006 under the National Environmental Management Act (No. 107 of 1998), as amended, for the afore-mentioned project was granted by the Department of Environmental Affairs (DEA) on 26 May 2010.

In terms of regulation 10(2) of the EIA Regulations, 2006, the holder of the exemption (Eskom Holdings Limited) must notify every registered interested and affected party (I&AP), in writing within 10 calendar days, of receiving notice of the Department's decision to grant the exemption as well as the provisions regarding the making of appeals that are provided for in the regulations.

The notice outlines the conditions of exemption, key factors affecting the decision, recommendations and the appeal process. A copy of Annexure 1: Reasons for the Decision for the Environmental Exemption (EA) and a locality plan for the proposed project have been attached for your perusal and reference.

Should you wish to appeal aspects of the exemption, be advised that the notice of intention to appeal must be made to the Minister of Environmental Affairs, within 10 days of receiving this exemption notice from appointing an Independent EAP.
