AUTHORITIES			
DEA&DP Private BagX6509 George 6530 Mr. Francois Naude Email: fnaude@westerncape.gov.za Tel: 044 805 8600 Fax: 044 874 2423	-	5 November 2012	1X Hardcopy and CD of DBAR and EMP
		17 January 2013	Email sent to Malcolm Lamor requesting a status on DEA&DP's comments.
		24 January 2013	Response received from Mr. Lamor noting that he has relocated to DEA&DP office in Cape Town and is no longer responsible for applications dealt with in the George area.
		25 January 2013	Request email sent to Francois Naude enquiring on outstanding comments.
		7 February 2013	Comment received from DEA&DP noting: <ul style="list-style-type: none"> - The HIA contained in the DBAR reports on the visual intrusion of the proposed powerline on the local cultural / scenic landscape, however, the visual intrusion on the receiving environment from a tourism point of view is not explicitly described in the DBAR. In this regard please refer to the DEA&DP Guideline for involving visual & aesthetic specialists in the EIA process (2005) as this provides guidance on how visual impacts could be assessed and reported on. Furthermore, WCSDF identifies the N12/N9 as a scenic route with exposure to large number of people, especially passing tourist traffic and should therefore receive special consideration. - This Directorate hereby reminds you that the NEMA 1998 (Act No. 107 of 1998) specifically states that the principles set out in section 2 apply throughout the Republic to the action of all organs of state that may significantly affect the environment. The above-mentioned principles must therefore be considered and applied by approving authority in the taking of the

		<p>11 July 2013</p> <p>11 July 2013</p>	<p>decision. In this regard, please also take into cognisance of the requirement of section 38(8) of the National Heritage Resources Act, 1999 (Act 25 of 1999)</p> <p>SiVEST responded:</p> <ul style="list-style-type: none"> - Noted. Please refer to the NID response and Heritage Western Cape comment (Appendix E3) which requested an archeological assessment only. The preferred alternative route is not visible from the N12/N9 therefore visual impacts for this route is unlikely. As per HWC comment, should the alternative route be selected through the EIA process, a visual impact assessment will be completed in order to determine the potential visual impacts on the landscape and any scenic routes in the vicinity. Please refer to the EMP (Appendix G, Section 6.17) for a set of mitigation measures for potential visual impacts. - Noted. As stated above, please refer to the NID response and Heritage Western Cape comment (Appendix E3) in terms of the impact assessment process recommended for this project (archaeology only). All requested impact assessments have been completed by accredited, independent specialists and can be found in Appendix D of the Final BAR. Please refer to the EMP (Appendix G, Section 6.13) for all Heritage mitigation measures <p>FBAR PPP: 1x hardcopy and CD of FBAR and EMP</p>
<p>Department of Transport and Public Works Road Network Management 9 Dorp Street Cape Town 8000</p> <p>Ms. GD Swanepoel Email: grace.swanepeol@westerncape.gov.za Tel: 021 483 4669 Fax: 021 483 2166</p>	-	<p>21 January 2013</p> <p>23 January 2013</p> <p>11 July 2013</p>	<p>Letter received from the Road Network Management (Ms. GD Swanepoel) requesting registration of the branch as a Road Authority for various roads in the Dyssledorp and Oudstroom areas.</p> <p>SiVEST responded and confirmed I&AP registration of the branch.</p> <p>FBAR PPP: Email notification</p>
<p>Department of Water Affairs (DWA) Gourtiz WMA</p> <p>Private Bag 16 Sanlamhof Bellville 7532</p>	-	<p>5 November 2012</p> <p>3 December 2012</p>	<p>1X Hardcopy and CD of DBAR and EMP</p> <p>Comments received from DWA (D. Jephtha) noting:</p> <ul style="list-style-type: none"> - DWA has noted that the proposed activities falls within the 1:100 floodline of watercourses which constitutes a water use in terms of section 21(c) / (i) of the National Water Act, 1998. - DWA concurs with the preferred Route Alternative (A),

<p>Mr. John Roberts /Lameez Salim Fax: +27(86)62676 16 Email: robertsj@dwa.gov.za Email: hendricks12@dwa.gov.za</p> <p>D. Jeptha Email: jepthaD@dwa.gov.za</p>		<p style="text-align: center;">11 July 2013</p> <p style="text-align: center;">11 July 2013</p>	<p>as the existing transmission structures will minimise the additional impacts on the water courses.</p> <ul style="list-style-type: none"> - DWA is of the opinion that the construction of the powerline will not have a detrimental cumulative impact on the water courses if all mitigation measures as recommended by the specialist are implemented. DWA considers the intended water use within the ambit of a General Authorisation. All mitigation measures as prescribed in the Freshwater Assessment are implemented. Provide the Department with the geographical coordinates of all the pylons that fall within the watercourse. - Eskom must register the water use prior to commencement. <p>SiVEST responded:</p> <ul style="list-style-type: none"> - Noted. The preparations for a General Authorization application in terms of Section 21(c) and 21(i) are underway and will reach your Department in due course. Please refer to Appendix J for proof of a preliminary submission to your Department by Mr. Meyer de Villiers on 28 May 2013. - Noted. Please refer to the EMP (Appendix G, Section 6.14) for a complete set of mitigation measures as recommended by the Freshwater specialist. - Noted. Please refer to the EMP (Appendix G, Section 6.14) for a complete set of mitigation measures as recommended by the Freshwater specialist. The EMP is a contractually binding document for the Contractor, therefore all mitigation measures contained in the EMP must be observed during the construction and operational phase of this project. Please note that at this stage of the powerline design process the surveying for individual tower positions has not been completed, therefore exact coordinates cannot be supplied at this time. However, bend points, which have been mapped accurately at this stage of the project, can be used to extrapolate tower positions, due to the linear nature of the powerline. Bend points for the preferred alternative route and the alternative route, including bend points within 32m of watercourses, can be found in Appendix J. - Noted. Please refer to the response above in terms of a General Authorization application for the proposed project. <p>FBAR PPP: 1x hardcopy and CD of FBAR and EMP</p>
---	--	---	---

<p>Heritage Western Cape Private Bag X9067 Cape Town 8000</p> <p>Mr. Troy Smuts</p> <p>Email: Justin.bradfield@pgwc.gov.za Fax: 021 483 9543</p>	<p>-</p>	<p>5 November 2012</p> <p>19 December 2012</p> <p>11 July 2013</p>	<p>1X Hardcopy and CD of DBAR and EMP</p> <p>Final comment from HWC (Mr Troy Smuts) received noting:</p> <ul style="list-style-type: none"> - that HWC agreed that Alternative A is supported. Should Alternative B be selected by the decision maker, HWC requires that a visual impact be submitted to HWC in order to mitigate impacts. - If any burials are found which have not been exhumed, they should be exhumed (similarly to those already found). <p>SiVEST responded:</p> <ul style="list-style-type: none"> - Noted. Should Alternative route B be selected through this EIA process, a visual impact assessment will be completed by an accredited, independent specialist and submitted to HWC for review and comment. - Noted. Please refer to the EMP (Appendix G, Section 6.13) for mitigation measures with regards to archaeological or paleontological findings during the construction phase of this project. Should any remains be found, work will be halted immediately, the area demarcated as a “no-go” area and HWC notified. <p>FBAR PPP: 1x hardcopy and CD of FBAR and EMP</p>
<p>Eden District Municipality PO Box 12 George 6530</p> <p>HansOttervanger Roads Services Email: hans@edendm.co.za Fax: 086 555 6303</p>	<p>-</p>	<p>5 November 2012</p> <p>22 January 2013</p> <p>23 January 2013</p> <p>11 July 2013</p>	<p>1X Hardcopy and CD of DBAR and EMP</p> <p>SiVEST contacted Hans Ottervanger at Eden District Municipality to inquire on the status of outstanding comments.</p> <p>Eden Municipality can confirm that in principle there is no objection to the application for environmental approval. However, a formal application for way-leaves along or over provincial roads needs to be submitted for formal approval for a service alongside, within or crossing a provincial road reserve.</p> <p>SiVEST acknowledged that the Municipality has in principle no objection to the application based on the environmental approval.</p> <p>FBAR PPP: 1x hardcopy and CD of FBAR and EMP</p>
<p>George Municipality PO Box 19 George 6530</p> <p>Carel Venter</p> <p>Email: Carel@george.org.za</p>	<p>-</p>	<p>5 November 2012</p> <p>22 January 2013</p>	<p>1X Hardcopy and CD of DBAR and EMP</p> <p>Email sent to the municipality enquiring on outstanding comments.</p> <p>Response email sent from Carel Venter noting that he has not received the Application. Carel further noted that only a small portion of the activity falls within the George Municipal area and</p>

<p>Tel: 044 801 9476 Fax: 086 521 2522</p>		<p>11 July 2013</p>	<p>SiVEST must consult with the Oudtshoorn Municipality. FBAR PPP: 1x hardcopy and CD of FBAR and EMP</p>
<p>Oudtshoorn Municipality P.O.Box 255 Oudtshoorn 6620 Corrie Greef Email: corrie@oudtmun.co.za Fax: 044203 30422</p>	<p>-</p>	<p>5 November 2012 22 January 2013 11 July 2013</p>	<p>1X Hardcopy and CD of DBAR and EMP SiVEST followed up with Corrie Greef at Oudtshoorn Municipality with regards to outstanding comments, however a response was never received. FBAR PPP: 1x hardcopy and CD of FBAR and EMP</p>
<p>CapeNature Private BagX6546 George 6530 Mr. Benjamin Walton Email: landusegeorge@capenature.co.za Fax: 086 645 2546</p>	<p>-</p>	<p>5 November 2012 28 February 2013</p>	<p>1X Hardcopy and CD of DBAR and EMP Comment received from CapeNature (Mr. Benjamin Walton) noting the following:</p> <ul style="list-style-type: none"> - The botanical report acknowledged that the entire length of the alternative routes was not surveyed and vegetation patterns were extrapolated with point vegetation surveying and maps; as indicated on the partially legible figure 4. - As indicated in the freshwater assessment report all ephemeral streams (and / or drainage lines) and tributaries of the abovementioned rivers have been identified as important Ecological Support Areas; based on being potential aquatic habitats; with habitats for threatened ecosystems; and as priorities identified by other fine-scale plans. CapeNature agrees with the findings and recommendations provided by the aquatic specialist. - CapeNature will not support the loss of any threatened ecosystems, neither the transformation of identified sensitive areas (CBA's / ESA's / NFEPA's); and nor incompatible land uses for biodiversity conservation objectives. All endangered species or protected species listed in Schedules 3 and 4 respectively, in terms of the Western Cape Nature Conservation Laws Amendment Act, 2000 (Act No. 3 of 2000) may not be picked or removed without the relevant permit, which must be obtained from CapeNature, should endangered or protected species be found to occur on site. - CapeNature requires more information based on operational experience with Eskom distribution implementing activities during refurbishment of servitudes and infrastructure, as well as the installation of new servitudes and structures such as this. It is recommended that the botanical evaluation be

		<p style="text-align: center;">11 July 2013</p>	<p>complemented by a detailed focused description of vegetation occurring at each tower position so that this can further inform a site and habitat specific EMP; conducted by a qualified individual familiar with the terrain. Protected or endangered plant species that may have to be moved away from a tower position can be applied for by a plant collection / removal permit. CapeNature requires in addition to spatially explicit tower positions (in the form of a shapefile) an indication of proposed access routes to each and every tower position (preferably in the form of a shapefile), so that potential impacts can be adequately scoped and assessed before commencement.</p> <p>SiVEST responded:</p> <ul style="list-style-type: none"> - Noted. Due to limited access to alternative route 2 (lack of access roads, steep terrain) the specialist was not able to access the entire length of the alternative route. The specialist utilized up-to-date vegetation maps issued by SANBI, CapeNature and accredited vegetation guides to provide an accurate extrapolation where a site analysis was not possible. Please refer to the Botanical report for extrapolations and locations where site inspections were possible. - Noted. Please note that all mitigation measures and recommendations by the freshwater specialist have been incorporated into the EMP (Appendix G) in Section 6.7, page 10. - Noted. Please refer to the Botanical report (Appendix D) as well as the EMP (Appendix G, section 6.7) for mitigation measures in terms of vegetation management. Further, please refer to the EMP page 16 with regards to the application for plant collection/ removal permits. - Noted. Please note that at this stage of the powerline design process the surveying for individual tower positions has not been completed, therefore exact coordinates cannot be supplied at this time. Due to the high cost implications of powerline surveys, Eskom completes such a survey, resulting in the finalized route and exact tower positions, for the route alternative which receives a positive Environmental Authorization. As a result the location of potential access roads required also cannot be established at this time. However, bend points, which have been mapped accurately at this stage of the project, can be used to extrapolate tower positions, due to the linear nature of the powerline. Bend points for the preferred alternative
--	--	--	---

			<p>route and the alternative route can be found in Appendix J. These bend points do not represent all the towers to be erected for the proposed powerline, however, at this stage of the project these coordinates provide accurate tower positions for some of the towers to be erected. In terms of the vegetation assessment, please refer to the Botanical report in Appendix D. A corridor approach, with multiple sampling points within the corridor, was taken by the Botanical specialist in order to obtain the most accurate impact assessment without the availability of exact tower positions. It is customary for Eskom to conduct a detailed route walk during the surveying of a powerline. This route walk can be conducted with a qualified Botanical specialist which can identify any areas of concern in terms of sensitive vegetation before commencement of construction (refer to the EMP, Appendix G, page 7). As per EMP (Appendix G, page 16) plant removal/ removal permits will be applied for applicable.</p>
